

PROFESSIONAL DRYER CLEANING SHOULD INCLUDE:

**Inspection (including
inside the dryer vent)**

**Thorough cleaning
(rotary brush + vacuum)**

Airflow verification

**Final performance
check**

True pros carefully check the status of the whole system and report to owners any anomaly, such as broken or perforated flexible ducts, corroded, broken or missing parts in the dryer or duct.

SO, WHAT SHOULD I DO?

Choose a professional dryer vent cleaning company

One that has well-trained technicians, real pro equipment, and experience working in high rises in the Miami area.

Ask the Management Office for assistance

Management can recommend reputable providers that comply with the building's insurance requirements

DRYER VENT CLEANING

SAFETY, EFFICIENCY AND PEACE OF MIND

**For Residents of
VillaBlue Miami Condo**

DID YOU KNOW?

Thousands of dryer fires occur every year due to lint buildup because most dryer vents are seldom or never inspected or cleaned

A clogged vent can:

- Increase fire risk
- Make you wait longer for clothes to dry
- Waste energy/ make you pay more for energy bills

WARNING SIGNS!

You may need cleaning if:

- Clothes take longer to dry
- Dryer feels hot to the touch
- The “check vent” light comes off on the dryer’s control panel
- Condensation on the dryer door

Because nobody sees it, it is almost always delayed or simply ignored, until it becomes an emergency!

A CLEAN DRYER VENT

- ✓ REDUCES FIRE RISK
- ✓ CUTS ENERGY COSTS
- ✓ HELP CLOTHES DRY FASTER
- ✓ EXTENDS APPLIANCE LIFE

You get peace of mind: your home is safer, and your dryer is working as it should
