GINDUMAC Integrates Machinery Purchase & Fulfillment GmbH Activities Into Its Operations

Kaiserslautern, January 10, 2025. **GINDUMAC has successfully integrated the activities of Machinery Purchase & Fulfillment GmbH (MPF GmbH) into its core operations. Originally established to enhance GINDUMAC's purchasing capabilities through direct investments with a dedicated fund, MPF GmbH has now been closed, with its expertise and resources fully embedded within GINDUMAC.**

This integration strengthens GINDUMAC's position as a leader in the global used machinery trade, enhancing its ability to manage complex projects, including dealer partnerships, project-based financing, and fulfillment—key areas that were previously supported by MPF GmbH.

With direct purchasing now fully managed within the GINDUMAC Group, the company, along with its subsidiary Wehrmann Holzbearbeitungsmaschinen GmbH & Co. KG, is well-positioned to expand its inventory of high-quality machinery and offer even greater flexibility to its clients.

About GINDUMAC

GINDUMAC operates an online platform for global used machinery trading. For sellers and buyers of used industrial machinery, GINDUMAC offers complete transaction processing with an all-round carefree package. The company focuses on the back-to-back business of used metal, sheet metal, plastics processing and wood working machinery from various international manufacturers.

About Wehrmann

Wehrmann offers comprehensive repair services for woodworking machines and ensures continuous supply readiness for its customers through an extensive spare parts inventory. Large, well-equipped workshops allow for minimal downtime with high flexibility. Wehrmann has long-standing experience in the buying and selling of used woodworking machines and maintains a permanent stock of machines for its customers. The range is complemented in the DACH region by new machines through close connections to premium machine manufacturers.
