

Server Connection

Settings for software updates and cloud connection

01 / OPEN SETTINGS

On the main screen, open Settings under Technician Settings.

02 / CHECK SERVER URL

Make sure Server URL is set to:

44.201.9.213

03 / CHECK SERVER PORT

Make sure Server Port is set to:

8011

SAVE THE SETTINGS

If either value is incorrect, enter the correct value and select Save Settings.

Use a stable network connection for updates and cloud access.
