

# Server Connection

Settings for software updates and cloud connection

## 01 / OPEN SETTINGS

On the main screen, open Settings under Technician Settings.

## 02 / CHECK SERVER URL

Make sure Server URL is set to:

**44.201.9.213**

## 03 / CHECK SERVER PORT

Make sure Server Port is set to:

**8021**

## SAVE THE SETTINGS

If either value is incorrect, enter the correct value and select Save Settings.

Use a stable network connection for updates and cloud access.
