

PRODUCT DESCRIPTION

STATUS GLK 10W-40 is a high-performance synthetic engine oil designed to provide superior protection against the most demanding conditions of the modern engine. Factors such as fuel quality, high temperatures, and severe driving can cause sludge formation that negatively affects engine performance and lifespan.

This lubricant incorporates advanced active cleaning technology (antisludge) that works by removing existing deposits and preventing the formation of new residues. In this way, it ensures proper oil circulation, greater protection of internal components, and more efficient engine operation.

Its formulation provides excellent thermal stability, oxidation resistance, and protection against viscosity loss, ensuring consistent performance even under extreme conditions.

STATUS GLK 10W-40 is recommended for gasoline and diesel engines where a lubricant with ACEA A3/B3 and A3/B4 specifications is required, offering an optimal combination of cleaning, protection, and durability.

Key Benefits

- Advanced antisludge technology (sludge cleaning)
- Removes existing deposits and prevents new formation
- Improves oil circulation in the engine
- High thermal and oxidation resistance
- Protection against viscosity loss
- Excellent protection against high-temperature deposits
- Extends engine life
- Formulated with premium bases and anti-wear additives
- Suitable for gasoline and diesel engines

TECHNICAL PROPERTIES

trad_Propiedad	trad_Valor
SAE GRADE	10W-40
VISCOSITY AT 100°C	12,50 - 16,3
VISCOSITY AT -25°C	<7000
VISCOSITY INDEX	150
FLASH POINT	222
POUR POINT	-38
SULPHATED ASH	<1,6
TBN	>10,0

SAFETY AND HYGIENE

Safety Data Sheets are available upon request and should be consulted for detailed information on the correct handling and use of the product. The company is not responsible for damages resulting from improper use or failure to comply with the indicated precautions and recommendations. — translated

IMPORTANT NOTE
