YOUR CREW. OUR PIPELINE.

Running an independent crew means constantly hunting for the next job, negotiating price from scratch every time, and hoping the general contractor pays on time. West Framing gives established framing crews a steady, contracted pipeline of production homes across multiple growing markets — so your crew stays busy and you stay focused on building, not chasing work. We're a family-oriented company, and once your crew is on our team, you're part of the West Framing family.

WHY CONTRACT CREWS PARTNER WITH WEST FRAMING

- ✓ Steady, contracted volume — plug into an established production pipeline instead of hunting job to job
- ✓ Paid weekly — reliable, on-time payment tracked accurately with Workyard, no chasing checks
- ✓ Fair, consistent unit/piece pricing set up front — know your numbers before you start
- ✓ Materials staged and jobs sequenced — professional site management protects your crew's production rate
