

The Dalilah Law

Named at the 2026 State of the Union

- ✓ Verify driver credentials before freight moves
- ✓ Prevent CDL fraud & unauthorized operators
- ✓ Protect legitimate carriers and the American public

FEATURE STORY

Dalilah's Story

Dalilah Coleman was a vibrant young girl whose life was changed forever when a driver operating with fraudulent credentials caused a devastating crash. The driver had no business behind the wheel — yet the system let him through.

Dalilah became the human face of a systemic problem hiding in plain sight: unauthorized operators moving freight across America every single day.

"The dock is the last real control point before freight disappears — and right now, anyone can pickup a load and drive away unchecked."

— DRIVER LEGITIMACY INITIATIVE

THE MANDATE

At the 2026 State of the Union, President Trump named our framework "*The Dalilah Law*" — turning a family's tragedy into a national mandate.

Verify - Credentials before freight moves

Accountability - Liability for those who skip verification

Protect - Compliant carriers and legitimate drivers

MAKING A DIFFERENCE

Progress & Impact

From a tragedy that transformed a family into advocates, the Driver Legitimacy™ Initiative has grown into a nationwide movement creating real change. We're building frameworks that work, engaging stakeholders across every layer of the supply chain, and turning policy into protection.

Dalilah's story didn't end in tragedy — it sparked a movement toward accountability and legitimacy in freight.
