

BLOCKCHAIN CAREERS FOR STUDENTS

**BLOCKCHAIN
KIDS USA**

**HELPING CHILDREN, PARENTS, AND SCHOOLS
UNDERSTAND THE NEXT GENERATION OF CAREERS**

Increasing

Many children and parents, especially in the United States, are not aware of the careers available in blockchain, smart contracts, blockchain legal fields, robotics, automation, and task-distributed software. These fields are available at only a few institutions, yet they are lucrative and increasingly important to the next generation of careers.

WHY THIS MATTERS

We are looking to provide these directives for children with professionals in these fields to help schools guide students toward paths that may financially support their future families and reduce the risk of earning a degree that does not lead to sustainable income.

BUILDING EARLY AWARENESS

We believe children should begin learning the phrases, vocabulary, and future-focused concepts that will matter over the next 50 years.

We have created books with semi-fictional storytelling, QR codes that activate quizzes with interventional rewards, formatted storybooks about the blockchain industry as musicals, cartoon musicals, and audio storybook tellers.

CAREER PATHWAYS FOR STUDENTS

For career-focused students, we offer a complete guide into the industry, including the pre-requisites companies will require these skills, the daily responsibilities of these skills, and where children can go to acquire them.

FREE SUPPORT FOR FAMILIES

We have also built a free online resource guide to support children and families who cannot afford private programs while still giving them direction within a path toward opportunity.

BUILT FOR SCHOOLS. DESIGNED FOR IMPACT.

Equip your students with knowledge that creates opportunity, independence, and lifelong success.

BREAKDOWN OF BLOCKCHAIN EDUCATION IN THE US

The depth of blockchain education varies significantly across institutions.

- **AACSB-accredited business schools:** Out of 533 U.S. business schools accredited by the Association to Advance Collegiate Schools of Business (AACSB), 151 schools, approximately 28%, offer at least one specific course pertaining to Blockchain.
- **Dedicated degree and diploma options:** Dedicated technical-track platforms identify between 23 and 27 U.S. universities that offer formal degree concentrations, diplomas, or graduate certificates focused on blockchain and Web3 technologies.
- **Global course databases:** The Global Blockchain Business Council tracks over 1,500 individual courses and 130 full degree programs globally, with year-over-year growth in accredited U.S. institutions.

Not every child has a parent who knows or cares. Some children have been abandoned, and we built this for their wellbeing too. Blockchain Careers for Student Books is available as our first step forward.

WHY THIS MATTERS

BLOCKCHAIN CAREER AMBASSADOR – ROLE OVERVIEW

Our company is the first company in the United States to offer shared equity for our book products for Blockchain Education. Most mid-level business in the United States are not aware of the effects or integration of blockchain technology. This gives those who work with us first mover advantage. We have built resources no other company has attempted or offered to American families, and we welcome the opportunity to grow with us and cover the offering of blockchain education to every state.

BLOCKCHAIN CAREER AMBASSADOR – ROLE OVERVIEW

a Blockchain Career Ambassador serves as a career-driven coach and community leader, guiding students from Pre-K through adulthood into the new economy, helping families, schools, and communities understand the skills, vocabulary, and career pathways emerging in blockchain, robotics, AI, and advanced technologies.
