REFINED BY FIRE

30-DAY PILOT PROGRAM

PERFORMANCE & RECOVERY INSTITUTE · refinedbyfireperformance.com

The Problem We Solve

Clinicians spend 1 hour per week with each patient. The other 167 hours are invisible. Refined By Fire closes the 120-hour gap between clinical visits — tracking daily behavior, adherence, and recovery psychology so you see what happens when the appointment ends.

1 hr	167 hrs	94%
Clinical contact per week	Unmonitored recovery time	Recovery time untracked

What's Included in the 30-Day Pilot

Full Platform Access

Complete RBF Recovery OS deployment — no IT integration required.

Patient Onboarding

QR code onboarding in under 3 minutes. Zero wearables. Minimum friction.

WTH Index™ Tracking

Daily behavioral logs processed into Will to Heal Index scores — a leading indicator clinicians can act on between visits.

Clinician Dashboard

Pre-visit behavioral summaries, risk flags, and recovery trajectory data delivered before each appointment.

PROMIS / DASH / PHQ-9 Aligned

IRB-ready data exports mapped to validated clinical instruments.

Dedicated Support

Direct access to Omar Basnight and the RBF team throughout the pilot.

30-Day Outcomes Report

Full longitudinal data report at conclusion — adherence rates, recovery trajectories, behavioral trends.

What It Requires From You

REQUIREMENT	DETAIL

Time commitment	1 onboarding call (30 min) + 5 min/week review
Patient minimum	5–25 patients enrolled during the pilot period
IT integration	None required — QR code deployment only
Cost	**Subsidized for founding partners — contact for details**
Cancellation	No long-term commitment — pilot ends at 30 days

How the Pilot Works

WEEK 1	Onboarding call → Platform setup → Patient QR code distribution
WEEK 2–3	Daily behavioral tracking live → WTH Index™ scoring begins → Clinician dashboard active
WEEK 4	Full outcomes data available → Pre-visit summaries in use → Partnership review call
DAY 30	30-day outcomes report delivered → Decision on full deployment
