

 FOR IMMEDIATE RELEASE

StackHaus rebuilds wildfire-lost homes in under 12 months — one contract, one fixed price.

LOS ANGELES, CA · stackhaus.co

After a wildfire, many California families wait three to five years to return home – if they return at all. StackHaus delivers a complete, fixed-price rebuild, handling feasibility, insurance recovery, design, permitting, and construction so homeowners can get home in under twelve months.

"Families shouldn't lose years to a rebuild process built for everyone but them. One contract, one team, one fixed price – home in twelve months."

– Malik Shabazz, Founder & CEO, StackHaus

Every StackHaus home is built with reinforced concrete: Class A fire-rated, Cat 5 hurricane-rated, and about six times more insulated than wood-frame construction. That means **40% lower insurance premiums**.
