

How to Write Strong AI Prompts

A practical guide for educators & students

1

A strong AI prompt is clear, specific, and purposeful. It tells the AI **who you are**, **what you need**, and **how you want it delivered**.

The 5-Step Prompting Process

Quick Tips

Always start with **ACTION verbs** like "Explain", "Create", "Summarise", "Compare", "Analyse"
Be specific — the more detail you give, the better the response
Specify format: bullet points, table, paragraph, numbered list
Set the tone: formal, simple, creative, academic

Example Prompts in Action

❌ Vague Prompt

"Tell me about space."

✅ Strong Prompt

"Explain 3 key differences between planets and stars for a Year 7 science class. Use simple language and include one analogy for each."

The Prompt Formula

ROLE

+

CONTEXT

+

TASK

+

FORMAT

+

TONE

Combine these elements for consistently powerful prompts

Remember: AI is a tool — **YOU** are the thinker. Use AI to enhance your thinking, not replace it. 🧠
