

“Solving Cost, Labor, and Efficiency Challenges”

WHO WE ARE

Spectrum Robotics delivers AI-powered service and cleaning solutions that cut costs by 20–30%, with >95% uptime and scalable coverage. Through our diverse brand partnerships and multi-vendor solutions, we provide full lifecycle support, compliance-ready SaaS/RaaS models, and flexible in-house financing, driving procurement efficiency, cross-sector application, and enterprise growth.

Company Snapshot: Established: 2022 | All Major Credit Cards Accepted | Flexible Financing | Nationwide Sales, Service & Support
Product Related Deployments: Penn Entertainment, Mayo Clinic, Boyd Properties, Mercedes Benz, Hollywood Casinos, Walmart One Kitchen (Rockford, IL) and more to come...

CORE COMPETENCIES

Strategic Consulting In Robotics & Automation

We guide organizations in the planning and implementation of intelligent automation strategies—including robotics integration, IT modernization, and operational transformation—driving measurable ROI, efficiency gains, and long-term scalability.

Optimizing Business Processes with Robotics

Our robotics and automation solutions, supported by expert consulting, enhance business processes by up to 30%, reducing OPEX and minimizing CAPEX. We streamline operations to improve efficiency, cut costs, and drive sustainable growth.

Cross-Industry Expertise & Management

Serving a wide range of industries, including warehouses, health systems, hotels, higher-education, construction, transportation, large public facilities, data centers, and more, with specialized robotics and smart lighting solutions.

DIFFERENTIATORS

- People-First, Tech-Neutral brands that optimize workforce and processes for the right robotics and automation.
- A team of certified robotics, automation and financial specialists delivering innovative, scalable solutions and financing options.
- A multidisciplinary team offering creative, tailored approaches to drive innovative problem-solving and operational success.

OUR FULL PROJECT LIFECYCLE

Strategic Planning

Identify, Solve, and Deliver real-world and scalable solutions.

Reengineering processes today for profitability of tomorrow.

Business Process Reengineering

Gap Analysis & Roadmap

Develop plan for labor shortages and cost savings.

Define technical requirements and ‘pain-points’

Requirements Discovery

Solution Selection

Select brands that support smart robotic and automation solutions.

Oversight of end-to-end project implementation.

Project Management

Change Management

Evaluate existing workflows, workforce readiness, and organizational culture.

Optimize processes to maximize ROI and EBITDA.

Ongoing Optimization
