

CAPABILITY STATEMENT | DIRECTX LLC d/b/a DIRECTX MGT INC.

CAPABILITY STATEMENT

DirectX LLC d/b/a DirectX MGT Inc. is a Texas-based prime contractor and technology-enabled operations company. We coordinate people, assets, field execution, subcontractors, and technology through one accountable delivery model.

Capabilities span program management, logistics, field services, construction/facilities support, courier/warehousing, workforce coordination, custom software, and systems integration.

Core Capabilities

Program & Project Management

Planning, scheduling, staffing, subcontractor coordination, quality control, reporting, deployment, training, and support.

Logistics, Transportation & Field Operations

Supply-chain coordination, freight, carrier and driver operations, courier, warehousing, fleet support, and workforce coordination.

Construction, Facilities & Grounds

Construction and infrastructure support, facilities support, building maintenance, janitorial, grounds, lawn, and site-service coordination.

Software & Systems Integration

ERP, TMS, fleet platforms, CRM, portals, workflow automation, cloud applications, data processing, dashboards, and integrations.

Prime Contractor Model

DirectX serves as the customer-facing prime and manages requirements, schedule, staffing, qualified subcontractors, quality control, reporting, implementation, and ongoing support.

Rental assets - Horizon

Horizon Equipment Rentals - Full ERP

Texas | 2024 | Prime ERP architect, integration lead & software-development partner

Designed and built a complete rental ERP covering assets, rental contracts, customer management, reservations, availability, utilization, maintenance, inspections, billing, invoicing, employee workflows, reporting, and management dashboards. Scale: 1,000+ rental assets and multiple operating locations.

Result: Unified rental operations, maintenance, customers, employees, financial workflows, and management reporting in one operating environment.

Spruce Trucking - Logistics & Operations

Late 2023-2025 | Systems architect, development lead, logistics consultant & operations partner

Built and led logistics and operations systems for dispatch, settlements, invoicing, payroll, recruiting, truck acquisition, driver growth, cash-flow visibility, production, and reporting. Scale: approximately 30 trucks/drivers and more than \$12M in annual business activity.

Result: Centralized logistics, staffing, equipment growth, production, settlements, and cash-flow management.

Dlabaj Enterprises - ERP & Digital Operations

2024-2025 | Operations development lead, ERP/mobile architect & logistics transformation partner

Converted paper-driven operations into a digital operating environment combining logistics, brokerage, payroll, shop management, contracts, container sales, export/seaport workflows, and management reporting. Managed overseas partners, Port of Houston-to-Ennis container transport, brokerage assets/contracts, and super-oversize load operations. Supported logistics partnership development involving Tesla and Abel Machinery.

Result: Supported approximately \$24M in annual sales activity and improved sales execution, security, completion visibility, team coordination, and operational scalability.

JW Logistics - 4PL Transformation & AI TMS

2025-2026 | 4PL operations-development partner, software architect & workforce-development lead

Moved the organization from paper production to digital 4PL operations. Built custom logistics software and an AI-enabled TMS for operations, contractors, customer management, production, finance, and reporting. Developed employee/contractor workflows and custom finance solutions enabling rapid contractor payment after completed deliveries.

Result: Placed 25 operations-management contracts and grew the company to approximately \$9.7M in annualized business activity within three months.

Healthcare IT Risk Assessment

2024-2025 | IT-risk assessment coordinator & technology consultant

Performed asset inventory, application review, access-control review, data-flow mapping, vendor-risk review, incident-response gap analysis, and remediation planning across a healthcare-services environment.

Result: Delivered a risk register, documented control gaps, and prioritized remediation roadmap.

SOFTWARE PORTFOLIO + DELIVERY CAPACITY + CONTRACTING PROFILE

SOFTWARE PORTFOLIO + DELIVERY CAPACITY

DirectX-developed platforms extend operating knowledge into customer-facing systems, automation, and management visibility.

DirectX Software Portfolio

Rental Command | Deployed / production

Equipment-rental ERP: fleet, reservations, utilization, maintenance, billing, inspections, reporting, and portals.

Tow Command | Demonstration-ready

Heavy-tow ERP: dispatch, storage, repair, invoices, rates, AI receptionist, customer portal, and rate engine.

Specialized Command | Active development

Specialized and petroleum dispatch, settlements, IFTA, fuel, terminals, stations, and compartment planning.

Vending Business OS | Demonstration-ready

Machines, slots, digital twins, inventory, routes, technicians, refill command, dispatch, and operational intelligence.

DirectX Auto | Active development

Vehicle-rental fleet management, bookings, maintenance, payments, marketplace channels, and customer portal.

Launchpad AI / ClientOS / Command Center | Production / active

Carrier onboarding, CRM, projects, communications, reporting, operational management, and KPI visibility.

Loadmii / MiiTruckin | Active development

Load, rate, settlement, driver-status, document, and mobile field workflows.

Additional platforms | Active portfolio

LeadCommand AI, ClientCommand, DirectBook AI, VALO, Factoring OS, WarehouseX Command, YardX Command, FreightView, and Orbit.

Delivery Ecosystem

Bell Federal Systems

Federal capture, proposal coordination, contract-administration support, and government-market guidance.

Innovative Logic Systems

Cybersecurity, penetration testing, software security assessment, infrastructure review, and technical security support.

OptimalMD

Active 2026 workforce-health partnership focused on logistics-industry market development, sales enablement, enrollment strategy, and technology integration.

Supporting ecosystem

Dell Technologies; Bridgeway; Rush Truck Solutions; Single Point Solutions.

NAICS Coverage

43+ active NAICS classifications covering logistics, transportation, technology, construction support, facilities, grounds, warehousing, management consulting, and field services.

236220, 238990, 484110, 484121, 484122, 484230, 488510, 492110, 493110, 541511, 541512, 541519, 541611, 541614, 541618, 561210, 561720, 561730, 561790, 811111
