

SYSTEM REPLACEMENTS PRICES

2 main factors replacement costs are size and ductwork. Ductwork costs range from \$500 to \$2,500 and vary by job scope and complexity.

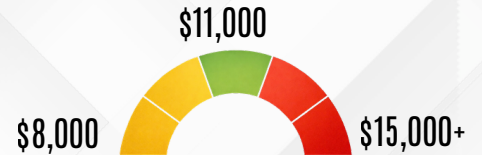

Single Stage (5 Ton)

\$11,000

Runs at one speed only—full power on or completely off.

Lower upfront cost, but less precise temperature control and efficiency.

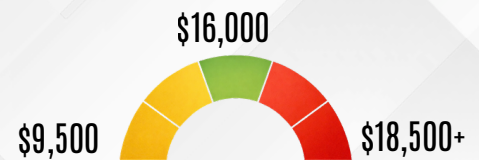

2 Stage (5 Ton)

\$16,000

Operates at 2 levels—medium & high speed depending on demand.

Provides better comfort, quieter operation, and improved efficiency.

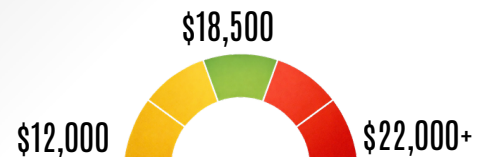

Variable Speed

\$18,500

Continuously adjusts output to match the exact needs of your home.

Delivers the best comfort, humidity control, and energy efficiency, with the highest upfront cost.

Mini-Splits

\$5,000

Mini-split systems are heating and cooling units that don't require traditional ductwork.

They're a great option for homes without existing ductwork, room additions, and garages. Electrician need for power.
