MEASURE 4-249

WILL EXPAND AFFORDABLE CARE ON THE NORTH COAST

This November, our community will vote on a bond measure to build a new skilled nursing facility in Astoria. The current building opened in 1926 and was not designed for modern skilled nursing. If approved, **the new facility is designed to improve patient care and safety, allowing local families to find care for their loved ones close to home.**

- **Help preserve local access to skilled nursing,** rehabilitation, and long-term care, including services covered by Medicare and Medicaid.
- **Increase safety** with all resident rooms on the main level, allowing staff to quickly evacuate residents in an emergency, regardless of mobility.
- **Improve health outcomes** by keeping care close to home so residents can receive care locally near their families and friends.
