

+ FAQ

What happens during treatment?

The Emerald Laser uses 10 x 532nm true green low-level laser beams to create temporary openings in fat cells. This allows the fatty liquids inside the cells to escape and be flushed out by your body's natural detox system — the lymphatic system.

Once the fat cells are emptied, they shrink and become normal, healthy cells, helping to keep your hormones balanced.

The Ballancer Pro can also be added to the treatment to speed up the removal of fat from your body, helping you see results more quickly.

How long is a treatment?

A treatment session usually lasts 1-hr and it may consist of:

- 30-mins Emerald Laser
- 20-mins Ballancer Pro
- Before & After photos

How many treatments are required?

The number of treatments required varies from individual to individual depending on several factors. A bespoke plan is created specifically for your needs. The average treatment course is usually 8-12 sessions.

+ The Results

The Emerald Laser causes no bruising or swelling, no side effects and has no down-time. The treatment is non-invasive, with no discomfort or pain, and none of the risks associated with surgical procedures such as liposuction.

*Individual results may vary.

Shape your Future Self
Fat reduction without surgery

No Surgery

No Downtime

EMERALD™
LASER

Get the Body You Deserve Without Surgery

We provide state-of-the-art, clinically proven technologies tailored for a safe, effective, and comfortable fat loss experience, helping you achieve your body goals with no downtime.

01
SCAN

3D Body Analysis
with **Styku**

Experience cutting-edge AI-powered technology with the Styku 3D Body Scan.

With advanced 3D imaging, you'll receive precise body measurements and in-depth body composition analysis like never before.

Track your progress beyond just numbers and focus on achieving your health and wellness goals.

3D model and photographs to track your before/after progress

02
MELT

Body Sculpting
with **Emerald Laser**

Clinically proven to be the safest and most effective way to lose fat.

Experience the future of body sculpting without the adverse side effects associated with surgical and other weight loss procedures, such as liposuction, fat freezing, and body wraps.

The Emerald Laser is the only technology in the world with FDA clearance for overall body circumference reduction in patients with a BMI of 40 or higher.

Emerald laser sessions last for about 30-mins

03
FLUSH

Lymphatic Stimulation
with **Ballancer Pro**

Experience the world's most advanced compression therapy system.

Clinically proven to speed up muscle recovery and flush the lymphatic system. The Ballancer Pro enhances your recovery after Emerald Treatments for optimal results.

Backed by decades of medical research, this system uses gentle compression to stimulate circulation and promote lymphatic drainage, helping to eliminate toxins and reduce swelling.

Ballancer Pro sessions last for about 20-mins
