Capability Statement

In 2007, Jordan Rail Pty Ltd was established and focused primarily on providing Hi-Rail plant and skilled operators to the Rail Industry throughout Australia.

Jordan Rail's capability is built on our extensive knowledge of delivering and maintaining small—or large-scale projects. With decades of collective experience in the logistical challenges of railway work, our people offer superior knowledge and service. We understand every element of the rail environment and the complexities associated with terrain and seasonal challenges.

Our highly skilled team continually contributes to successful projects, evidenced by our experience across the full suite of railway and infrastructure services. We have the flexibility to meet various client needs, from single-visit plant-only spot hires to multi-year supplier, maintainer, and operator frameworks.

Jordan Rail provides safe, efficient and effective railway construction and maintenance services to track projects throughout Australia. At Jordan Rail, we specialise in

- New Track Construction
- Maintenance of Existing Track
- Emergency Track Repairs
- Timber, Concrete and Steel Sleeper Installation
- Re-Railing
- Side Insertion
- Turnout Construction Specialists
- Level Crossing Renewals
- Drainage
- Mud-hole Removals
- Undercutting
- Rail Bridge Deck Replacements
- Foundation for Overhead Line Equipment
- Rail Structures Installation
- Steelwork Erection
- Light & Electrical Poles Installation
- Hi-Rail Crane Service
- Piling Works from Track
- Casing/sleeve installation or extraction
- Sheet Piling
- Specialised Rail Attachments
- Plant Hire
- Operator, Dogman, Rigger, Spotter and Labour Hire
- Track Inspections
- Track Certifying
- Heavy Haulage - Transport of Plant & Equipment

Our high-performing teams are on standby with the right resources for rapid mobilisation to suit even the most challenging program of works. We pride ourselves on our professionalism, adaptability, and efficient delivery. We only engage businesses that share our commitment to safety, sustainability, and diversity and embrace our core values.

Jordan Rail offers:

- The highest quality personnel for your job
- The competitive price in the market
- A highly responsive approach to customer service
- Innovation, efficiency and continuous improvement
- Superior quality of plant and equipment
- Honesty and transparency

Operator Requirements

Our plant operators and labourers are highly qualified and experienced in rail track construction and maintenance projects. All operators are registered with the Rail Industry Worker Program and complete regular training and competence assessments. Jordan Rail minimum operator requirements are:

- | | |
|---|---|
| • White Card | • Laboratory Drug and Alcohol screening (as required) |
| • Driver Licence | • Travel Rail Bound Plant / Road Rail Plant - |
| • Track Access / Awareness and Rail Safety Cards | Track Machine Medium/Heavy (as required) |
| • Certificate 2 & 3 in Rail Infrastructure (as required) | • On Track Plant Operator - Hi Rail (as required) |
| • Current Category 1 or 3, Rail Medical Examination (as required) | • Track Vehicle Operator (as required) |
| • Around the Track Personnel (as required) | • Plant operators have current licences, competences and certificates |

Hi-Rail Plant and Equipment

All plant and equipment comprise the most recent, industry-leading products that will provide reliable service and meet all industry standards. All equipment is well-maintained with stringent preventive maintenance procedures and a continually expanding and updating fleet.

All Hi-Rail Plant comply with the following assessments:

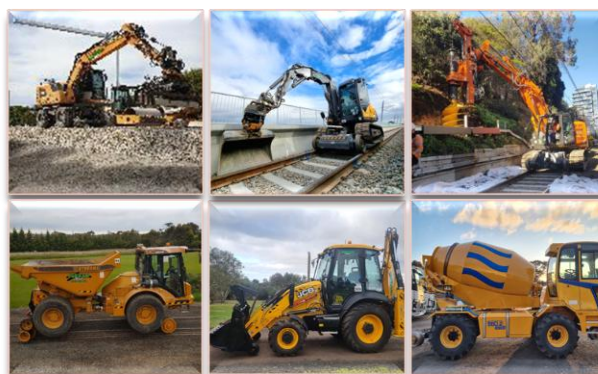

- Twist Test
- Load Share test
- Rolling Stock Outline Test
- Brake Performance Test
- Alignment Test
- Noise Test
- Plant Risk Assessments
- Rail NDD Test – Yearly
- Rail NDD Test – 10 Year
- Crane NDD Assessments
- EWP NDD Assessments
- Engineer's Assessment
- Engineering Reports
- Rail Lifting Charts

Jordan Rail has an extensive range of hi-rail plant and equipment to suit all rail situations. Our hi-rail equipment has the latest in safety and operating systems, such as

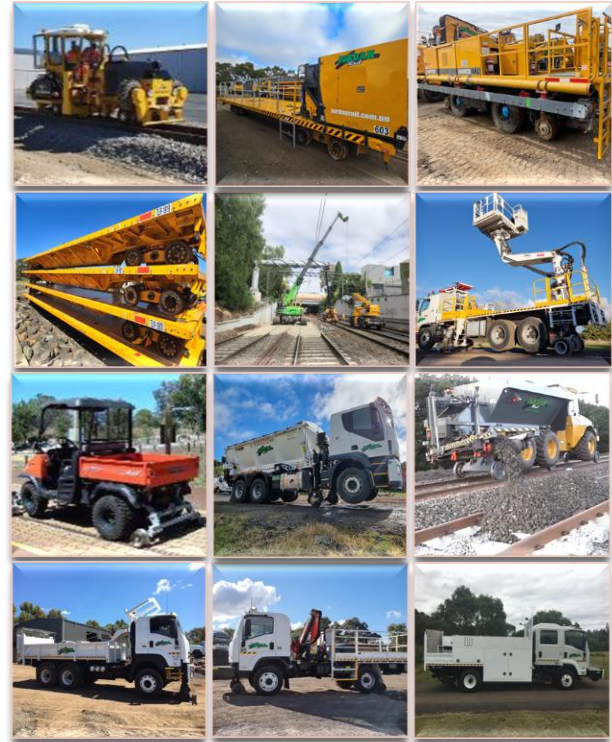

- Slew restrictors
- Height restrictors
- Insulated rail wheels & conforming to ANZR1 profile
- Up-to-date certifications, licensing, testing and permits
- Load management systems
- Vigilance and data logging systems
- Exclusion zone delineation lighting
- Object and person detection systems
- Tier 1 Rail Specs

Jordan Rail also offers many hi-rail plant hire options that can be tailored to your project. We can offer dry and wet hire options for all our plant and equipment, with prompt 24-hour service. Our operators are highly professional and come with RIIS/VOC accreditation before arrival on site. Our fleet includes:

- 8t-22t Hi-Rail Tracked Excavators
- 6t – 32t Hi-Rail Wheeled Excavators
- H-Rail Piling Rigs
- Hi-Rail Dumpers
- Hi-Rail Backhoes
- Hi-Rail Concrete Mixer / Agi Mixers

- Self-Propelled Tamper
- Rail Tug Vehicle
- Self-Propelled Trailer
- Rail Trailers
- Hi-Rail Crawler Cranes
- Hi-Rail EWP
- Hi-Rail RTV
- Hi-Rail Live Floor (Trout River) Trucks
- Hi-Rail Live Floor Moxy
- Hi-Rail Tipper Trucks
- Hi-Rail Flatbed Trucks
- Hi-Rail Crane Trucks
- Hi-Rail Gang Trucks
- Hi-Rail Water Carts
- Hi-Rail Weed Sprayers

Please refer to the Hi-Rail Capability Statement for more information on options and specifications

Civil Plant and Equipment

Jordan Rail has the capability and experience to operate safely in on-track, off-track, and underground environments. Our Civil Construction team offers safe, quality, and competitive turn-key solutions for a wide variety of civil construction applications, including earthworks, spoil movement, stockpile management, rock breaking, final trim works, piling pad preparation, piling works, foundations, retaining walls, structure and pole installation.

Our services are available 24 hours a day, 7 days a week, every day of the year.

We have successfully completed work on the most challenging, confined, and difficult sites without any problems or incidents. We can complete work in the most challenging conditions and scenarios, such as:

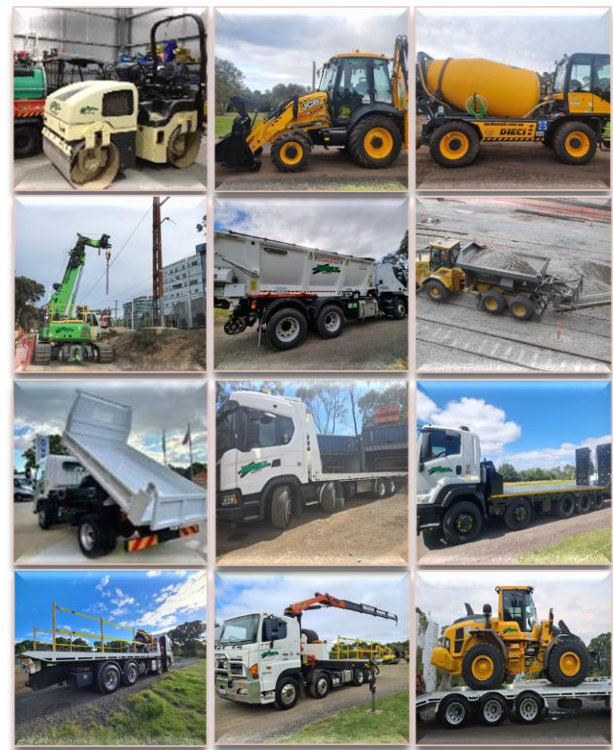

- Bulk Earthworks
- Final Trim
- Site Levelling
- Hardstand and Lay Down Areas
- In-Ground Services: Excavation, Trenching and Conduiting
- Plant Hire – Wet and Dry Hire
- Crane Service
- Labour Hire
- New Track Construction
- Drainage
- Piling Works
- Casing/sleeve installation or extraction
- Sheet Piling
- Light & Electrical Poles Installation
- Structure Installation
- Vertical wells for Dewatering
- Heavy Haulage - Transport of Plant & Equipment

Jordan Rail also offers many plant hire options tailored to your project. We can offer dry and wet hire options for all our civil plant and equipment with prompt 24-hour service. Our operators are highly professional and come with RIIS/VOC accreditation before arrival on site. Our fleet includes:

- 5t-40t Tracked Excavators
- 6t – 22t Wheeled Excavators
- Piling Rigs
- Posi Tracks / Skidsteers
- Site Dumpers
- Wheeled Loaders
- Dozers (D3 & D4)

- Rollers
- Backhoes
- Site Agi mixers
- Crawler Cranes
- Flocon (Trout River) Trucks
- Flocon Moxy
- Tipper Trucks
- 4t Tippers
- Tilt Tray Trucks
- Beavertail Trucks
- Flatbed Trucks
- Crane Trucks
- Tag Plant Trailers
- Watercarts

Please refer to the Civil Capability Statement for more information on options and specifications.

Heavy Haulage

Jordan Rail specialises in providing heavy plant, equipment, and material transport services to Australia's rail, construction, and government.

Jordan Rail offers many haulage truck options tailored to your project. We can offer dry and wet hire options for all our equipment, with prompt 24-hour service. Our fleet includes:

- Quad floats and dolly (up to 45 tons)
- Quad floats (up to 35 tons)
- Tri-axle floats (up to 26 tons)
- Extendable trailers (up to 27m)
- Flatbed and drop deck trailers
- B-Double Combinations
- Tilt tray trucks (8 x 4)
- Tilt tray trucks (8 x 4) with crane
- Tilt tray Trucks (8 x 2)
- Tilt tray Trucks (8 x 2) with crane
- Beavertail trucks (10 x 4)
- Beavertail trucks (8 x 4)
- Flatbed trucks (8 x 2)
- Flatbed trucks (4 x 2)
- Flatbed trucks (4 x 4)
- Flatbed trucks (4 x 4) with crane
- Flatbed trucks (4 x2) with crane
- Tri-axle plant trailers (up to 23 tons)
- Tandem axle plant trailers (up to 16 tons)

Please refer to the Heavy Haulage Capability Statement for more information on options and [Heavy Haulage Capability](#)

Workshop and Test Track

Jordan Rail has a modern Workshop facility for all our maintenance, inspections, assessments, and fabrication needs.

We offer an end-to-end service covering minor to significant rail works, planned asset maintenance from initial condition assessment, periodic inspection regimes, and remedial work execution. We manage shutdowns, perform corrective works, and provide reactive response activities, as well as quality and compliance auditing. We have systems for planned and corrective maintenance scheduling to make the most up-to-date data transparent to the client.

We also have our tri-gauge test track (narrow, standard, and broad gauge) for testing our rail systems for braking, wheel attraction, pivot movement, and attachment operations. The test track also assesses our operators' competence in getting on track, rail deployment, operating attachments, and braking.

A hazard awareness and prevention culture reinforces Jordan Rail's safety record. Our comprehensive occupational health and safety policy, in line with many of our clients, includes zero tolerance for drugs and alcohol.

Our plant and equipment are fitted with height and slew restrictors, safety cameras, Exclusion zone halos, object and person detection systems and smart reversing alarms that adjust their volume according to the noise on-site, ensuring safety while minimising the potential for noise complaints. All plant, equipment, and attachments are part of an extensive maintenance regime, and operators are trained to recognise and rectify any small problems before they become big.

Our operators have the training and experience to work effectively in the rail corridor's inherently hazardous environment. They also have the skills to work beneath live wires, near live tracks, underground services, and near other workers and the public.

Operators are supplied with a full range of personal protection equipment (PPE), and we work with individual customers to meet any site-specific needs.

Labour Hire

We can provide our clients with various labour solutions, from individual personnel hire and work crews to total project management. We can provide personnel in the following positions:

- TVO Operator (Hi-Rail)
- Machine Operators
- EWP Operators
- Crane Operators
- Float Drivers
- Truck Drivers
- Dogmen
- Rigger
- Labourers
- Spotters
- Trade Assistants
- Form Workers
- Track Inspectors
- Track Certifiers
- Leading Hands
- Rail Supervisors
- Civil Supervisors
- Piling Supervisors

Recent & Current Projects

Jordan Rail's recent and current projects are:

Project	Client	Scope	Tasks
ARTC - Maintenance	ARTC	Plant Hire – Dry hire of • Hi-Rail Plant • Civil Plant • Floats	• Supply of plant and equipment • Repair services • Labour hire
MTM - Maintenance	MTM	Plant Hire – Wet hire of • Hi-Rail Plant • Civil Plant • Floats	• Re-railing • Mud holes • Re-sleepering • Tamper support • Piling works • Materials transport • Labour hire
V/Line - Maintenance	V/Line	Plant Hire – Wet hire of • Hi-Rail Plant • Civil Plant	• Re-railing • Mud holes • Re-sleepering • Level crossing upgrades • Geotechnical testing
Queensland Rail - Maintenance	Queensland Rail	Plant Hire – Wet hire of • Hi-Rail Plant • Civil Plant	• Re-railing • Mud holes • Re-sleepering • Level crossing upgrades • General maintenance work • Civil works
Metro Tunnel	CYP	Plant Hire – Wet hire of • Hi-Rail Plant • Civil Plant • Floats • Flatbed Trucks • Labour	• Supply of specialised hi-rail concrete & tunnel equipment • Transporting materials in and out of the tunnel • Transporting materials from site to site • Concreting works • Installing infrastructure • Heavy haulage for structures and rail • Dry hire of ○ Hi-rail plant ○ Flatbed trucks ○ Crane trucks
Western Sydney Airport – Stations, Systems, Trains, Operations and Maintenance (SSTOM)	Rhomberg Sersa Australia	Plant Hire – Dry hire of • Hi-Rail Plant	• Dry hire of ○ Self-propelled rail trailer ○ Rail tug vehicle ○ Rail trailers • Repair services
Rio Tinto - Maintenance	Rio Tinto	Plant Hire – Wet hire of • Hi-Rail Plant	• Re-railing • Mud holes • Re-sleepering • General maintenance work
Bowen Rail - Maintenance	Bowen Rail	Plant Hire – Wet hire of • Hi-Rail Plant	• Re-railing • Mud holes • Re-sleepering • Mulching – vegetation control • General maintenance work

Project	Client	Scope	Tasks
Somerton Intermodal Terminal	Acciona	Plant Hire – Wet hire of • Civil Plant • Piling Plant • Hi-Rail Plant • Labour	• Piling works • Removing light poles • CSR works • Earthworks • Labour hire
Plant Hire and Heavy Haulage	Select Plant Hire	Plant Hire – Wet hire of • Hi-Rail Plant • Civil Plant • Floats • Labour	• Heavy Haulage • Re-railing • Mud holes • Re-sleepering • Tamper support • Piling works • Materials transport • Construction works • Labour hire
Port of Melbourne	Laing O'Rourke	• Labour Hire	• Labour hire
M80 Ring Road – Construction works	Acciona	Plant Hire – Wet & dry hire of • Hi-Rail Plant • Civil Plant • Drilling Plant • Labour	• Heavy haulage • Dry hire of piling rig • Piling works • Track work • Construction works • Labour hire
VicConnect – Plant Hire	VicConnect Alliance	Plant Hire – Wet & dry hire of • Hi-Rail Plant • Civil Plant • Piling plant	• Piling works • Track work • Construction works • Labour hire
Minors Works (Vic & SA)	Acciona	Plant Hire – Wet & dry hire of • Hi-Rail Plant • Civil Plant	• Maintenance works • Track work • Construction works • Labour hire
Minors Works (Vic)	John Holland	Plant Hire – Wet & dry hire of • Hi-Rail Plant • Civil Plant • Piling Plant	• Maintenance works • Track work • Construction works • Piling works • Labour hire
LCRP - NWPA	John Holland	Plant Hire – Wet hire of • Civil Plant • Piling Plant • Hi-Rail Plant	• Piling works • Track work • Construction works • Labour hire
LCRP - WPA	McConnell Dowell	Plant Hire – Wet hire of • Civil Plant • Piling Plant • Hi-Rail Plant	• Piling works • Track work • Construction works
Werribee Open Range Zoo	Lee Brothers Group	Plant Hire – Wet hire of • Civil Plant • Piling Plant • Tippers	• Installing the E • elephant enclosure fencing • Labour hire • Spotter
Western Outer Ring Main (WORM)	Spiecapag	Plant Hire – Dry hire of • Civil Plant • Piling Rig • Crane truck	• Supply of plant and equipment • Repair services • Heavy Haulage
