SORBATECH® Cargo Bags

Flow Dry Technology®

Don't let moisture problems in shipping containers ruin your cargo or your reputation

SORBATECH® Cargo Bags control humidity, lower dew point, and prevent condensation in shipping containers (known as container rain or cargo sweat) which can lead to product damage. SORBATECH® Cargo Bags help ensure safe delivery of your product by protecting your cargo from fluctuating container conditions.

FEATURES & BENEFITS:

- *Absorbs up to 100% of its weight in moisture*
- *Clean, non-dusting bag made of Dupont™ Tyvek®*
- *Saves time in installation using the sturdy plastic hook*
- *Protects goods of all types from corrosion, mold, mildew and rust*

PRODUCT INFORMATION:

- *Each bag contains 1500 grams of desiccant blend*
- *Each bag is 14.5-inch long x 6.5-inch wide*
- *SORBATECH® Cargo Bags are supplied by the case (10 bags each)*
- *One case protects a 20-foot GP container; Two cases protect a 40-foot GP container*
- *Full skid quantities of 60 cases available for easy handling*

What causes container rain or cargo sweat?

High Humidity + **Temperature Drop** = **Condensation**

- loading in humid environments
- products with high moisture content
- package and dunnage with high moisture content

- drop when shipped to colder climates
- drop due to cold front
- drop with day-to-night temperature fluctuations

- when temperature drops below dew point
- when moisture condenses from vapor to liquid
- when colder air can no longer hold moisture

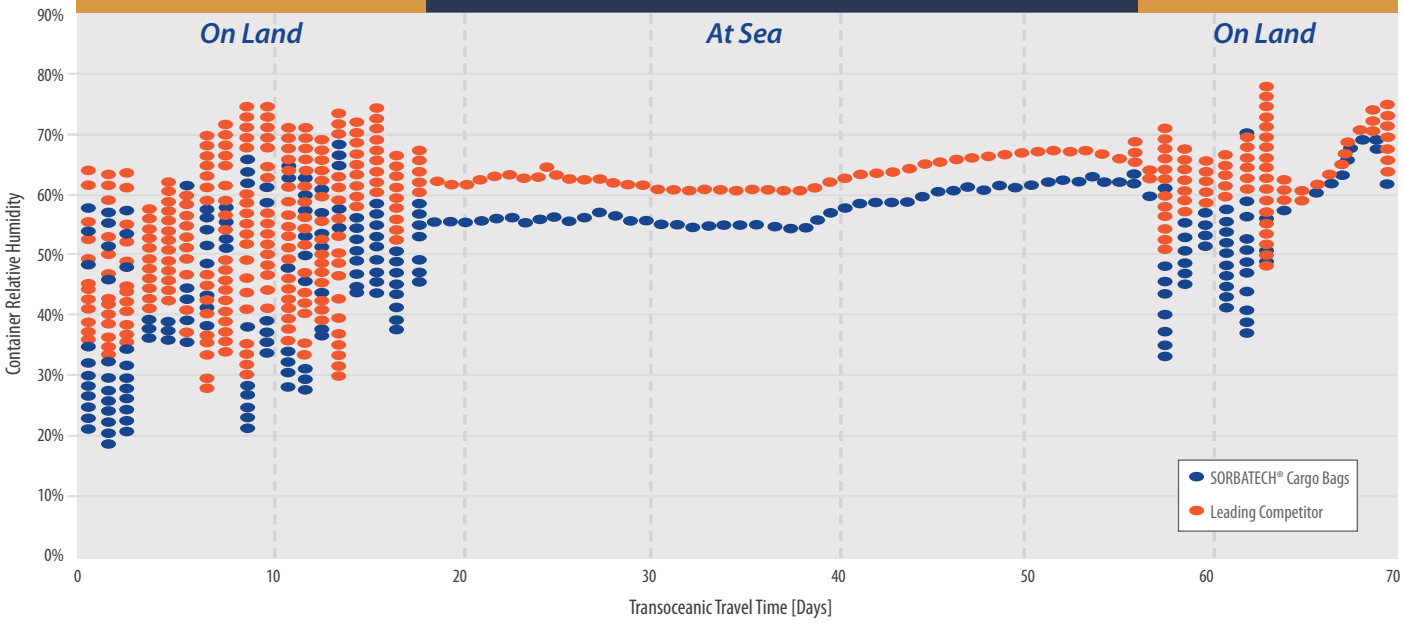

Protect the Shipping of Your Products with SORBATECH® Cargo Bags

Below is a side-by-side comparison for a transoceanic shipment of containers – one protected with SORBATECH® Cargo bags and one bag from a Leading Competitor. Each container is protected by the same number of 1.5KG bags. Note: Lower relative humidity is better to avoid condensation.

- Use of SORBATECH® Cargo Bags resulted in lower relative humidity inside the container at all times in this test.
- Protect your cargo and your reputation with SORBATECH® Cargo Bags
- This protection is especially important for the segments of transport where temperature fluctuations are greatest: on land, in this case.

Protect your cargo and your reputation with SORBATECH® Cargo Bags

About Flow Dry

Flow Dry Technology is a leading adsorbent manufacturer headquartered in Brookville, Ohio, with operations in Europe and China. Flow Dry provides a full line of standard desiccant products and the capability to custom design innovative solutions. Flow Dry offers the latest design and engineering technology in the gasket, packaging, sealing and injection molding business. Please visit www.FlowDry.com for more information.
