TANKLESS REVERSE OSMOSIS + ALKALINE

ClarityFlow RO

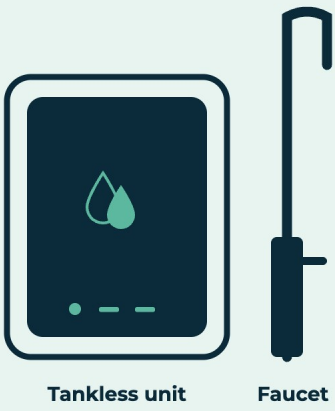

Purified drinking water made fresh on demand, with no storage tank. A compact under-sink unit filters through reverse osmosis, then adds minerals back for a smoother taste. Pairs with any ClarityShield whole-home system.

800 GPD
Purified water production*

0.53 GPM
Flow at the faucet*

2:1
Purified-to-drain water ratio*

No tank
Up to 70% less under-sink space*

SPECIFICATIONS

System type	**Tankless reverse osmosis**
Production*	**800 gallons per day**
Faucet flow*	**0.53 GPM**
Water ratio*	**2:1 purified to drain**
Filtration	**7-stage, 0.0001-micron RO membrane**
Post-filter	**Coconut carbon block + alkaline**
Membrane care	**Automatic flush**
Warranty	**1 year, RO system**

*Manufacturer ratings. Actual performance depends on water pressure, temperature and incoming water quality.

HOW IT WORKS

1. **Composite pre-filter**
Captures sediment and chlorine before water reaches the membrane.

2. **RO membrane**
Reduces total dissolved solids, made fresh as you pour.

3. **Carbon + alkaline**
Coconut carbon polishes taste; minerals are added back for smoothness.

4. **Auto flush**
Rinses the membrane automatically to help extend its life.

GOOD TO KNOW

Certified performance.
Certified to NSF/ANSI 58 for TDS reduction and structural integrity; lead-free water path to NSF/ANSI 372.

Needs a power outlet.
The unit runs a pump and indicator lights, so plan for an outlet under the sink.

Easy filter changes.
Cartridges twist out without tools. Some water still rinses to drain.
