Prices are installed prices. The financed price is higher than the cash price because it includes the cost of offering financing; it is the amount financed in the examples above, with no down payment. 18- and 24-month payments are shown at 9.99% and 29.99% APR. Your actual APR is set by U.S. Bank at approval, based on creditworthiness. Same-day discounts cannot be combined with financing.
