MumNest

VERSION 2.1.0 RELEASE NOTES

App Release: MumNest Version 2.1.0

Release Date: September 2026

Availability: Android & Web Browser

Document Standard: Australian English (AU-en)

Welcome to MumNest 2.1.0

Parenting is a journey filled with milestones, growth, and priceless moments. In Version 2.1.0, MumNest expands your ecosystem with seamless web browser access, smarter developmental sleep insights, and beautifully refined tracking tools created to bring ease and clarity to your daily routine.

Whether you are reviewing feeding schedules from a laptop, checking developmental sleep windows, or sharing health logs with your pediatrician, MumNest provides the support you need—whenever and wherever you need it.

Key Highlights at a Glance

NEW **Web Login Access**

Access your MumNest account directly from any computer browser at mumnest.app/login. Review records, track trends, and manage settings with desk-side convenience.

NEW **Header Navigation**

A dedicated "Log in" shortcut is now built directly into the site header across desktop views and mobile navigation menus for effortless sign-in.

ENHANCED **Sleep Milestones**

Receive age-tailored sleep milestone guidance cards that help you navigate 4-month regressions, nap transitions, and developmental sleep shifts with confidence.

ENHANCED **Profile Photo Crop**

Customise your baby's profile with an intuitive photo crop editor featuring smooth touch zoom and positioning for the perfect photo.

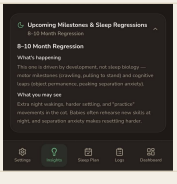

Designed for Everyday Peace of Mind

Smarter Insights & Comprehensive Exporting

MumNest 2.1.0 connects daily logging with meaningful developmental guidance. Weekly summary reports now format automatically into clear, topic-based sections for easy reading during pediatrician visits.

What's New & Improved

1. Access MumNest on Any Device

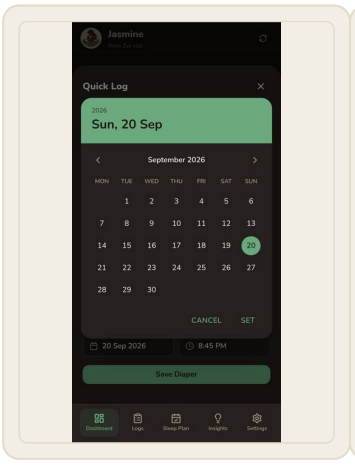

Your data stays synchronised across all platforms. Web browser login at `mumnest.app/login` is available for existing MumNest users who created their account through the Google Play app — the web app currently supports login only, so new accounts must be created via the Android app first.

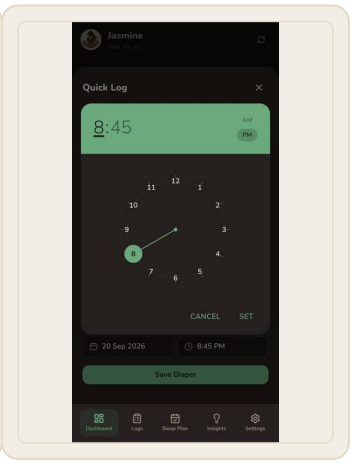

Web Login

2. Thoughtful Usability & Design Refinements

- Intuitive Date & Time Pickers: Modern calendar and radial clock selectors make entering or updating log times effortless and error-free.

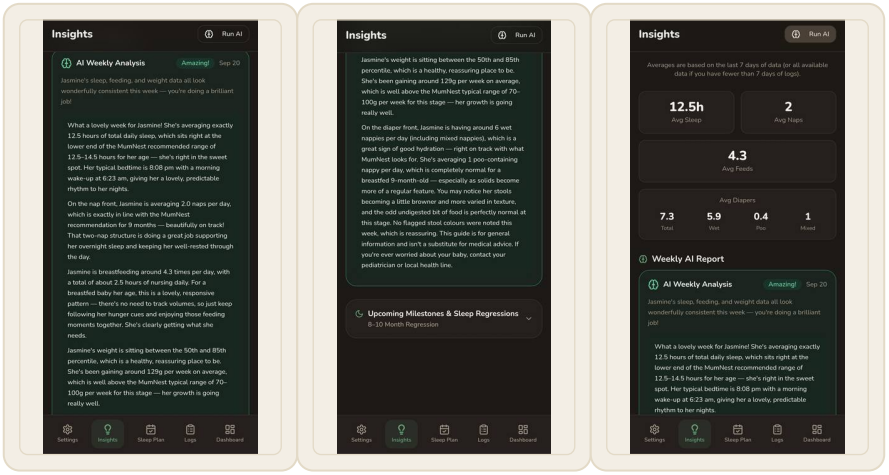

Calendar Date Picker

Radial Time Picker

- Smooth Settings Refresh: Instantly refresh your preference settings with a simple pull-down gesture designed with built-in safeguards to prevent accidental closing of open dialogs.

- Readable Weekly AI Insights: Weekly sleep and health summaries are organized into clear topic sections—feeding, sleep, diapers, and growth—making complex data easy to digest.

Weekly AI Insights **Weekly Insights (cont.)** **Weekly Summary Stats**

- One-Handed Mobile Comfort: Updated touch targets, refined visual icons, and smooth list controls ensure comfortable operation while holding your baby.

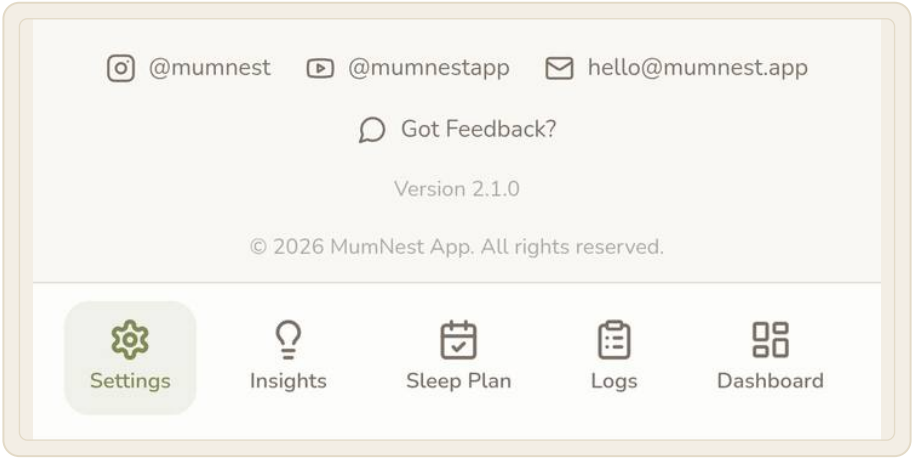

3. Rich Health & Growth Reports

Exporting your baby's logs is now more informative than ever:

- Visual Diaper Swatches: Exported logs include colour swatch indicators and texture notes, providing clear references for medical discussions.
- WHO Growth Charts: Exported files automatically include World Health Organization (WHO) weight-for-age growth charts for quick developmental tracking.
- Instant Mobile Sharing: Share exported spreadsheets directly through your phone's native share menu via email, message, or cloud storage.

Thank You for Being Part of MumNest

We build MumNest to support you through every stage of early parenthood. If you have feedback or suggestions, reach out through the "Got Feedback?" link in your app Settings.
