

A two-story brick house with a dark roof covered in solar panels. The house has white-framed windows and a front porch. The image is slightly faded to make the text stand out.

MES

MAYBURY ENERGY SERVICES

Powering a cleaner, greener future with trusted renewable solutions.

OUR MISSION

Maybury Energy Services is a premier UK-based renewable energy installer dedicated to accelerating the transition to a sustainable future. We bridge the gap between traditional utility services and cutting-edge green technology by delivering bespoke, high-efficiency solutions: including Solar PV, Battery Storage, and Air Source Heat Pumps for both domestic and commercial clients. Our mission is centred on a value-driven approach where technical excellence meets a seamless customer journey, ensuring that every project we undertake contributes to a cleaner, greener, and energy-independent world.

OUR SERVICES

- **Solar PV Systems:** Professional design and installation of high-performance solar panels to generate clean, independent electricity.
- **Battery Storage:** Advanced energy storage solutions to capture and store solar power for use during the night or peak hours.
- **Air Source Heat Pumps:** Sustainable, low-carbon heating systems that extract natural heat from the outside air to warm your property.
- **EV Charging:** Safe and efficient installation of smart electric vehicle chargers for residential and workplace use.
- **EICR Surveys:** Comprehensive Electrical Installation Condition Reports to ensure safety, compliance, and peak system performance.

FUNDING & CONTRACT OPPORTUNITIES

We provide expert guidance on current government incentives, including:

- **Boiler Upgrade Scheme (BUS):** Grants of £7,500 toward air source heat pump installations.
- **Warm Homes Social Housing Fund (SHDF):** Extensive experience in facilitating Wave 2 and the current Wave 3 SHDF funding for large-scale social housing retrofits.
- **Electric Vehicle Charge point grant:** Assistance in securing up to £500 per socket for eligible installations.
- **Commercial Support:** Facilitating transition support through the Business Energy Advice Service (BEAS) and regional energy efficiency grants to offset capital costs for infrastructure upgrades.
- **Warm Homes Local Grant:** Provides funding for energy-efficient home improvements to low-income households in England, helping reduce fuel bills and improve home warmth.
- **Warm Homes Plan:** which aims to upgrade five million homes over five years, delivering energy performance improvements and low-carbon heating to low-income households. Over 97% of eligible local authorities in England have been allocated funding to deliver the program.

THE MARKET OPPORTUNITY

The UK is at a critical energy inflection point driven by Clean Power 2030 targets and the multi-billion pound Warm Homes Plan. With solar installations set to triple and heat pump targets reaching 450,000 units annually, there is a massive, sustained demand for accredited installers. From commercial ESG mandates to large-scale social housing retrofits via SHDF funding, Maybury Energy Services is perfectly positioned to capture this growth by bridging the gap between government policy and professional onsite delivery.

OUR REVIEWS

Maybury Energy Services maintains a stellar reputation for professionalism and technical expertise, consistently earning high praise on platforms like Checkatrade and Trust Pilot. Customers frequently highlight our seamless end-to-end installations and our ability to simplify complex renewable transitions. With recurring themes of efficient service and high-standard workmanship, our reviews reflect a deep commitment to clean work sites, thorough handovers, and reliable long-term support for every client.

Thistle Scientific

We recently had solar panels installed on our roof and couldn't be happier with the experience. From the initial consultation to the final installation, the team was great.

Shakeel Khan

*A brilliant job and very professional
A brilliant job and very professional. I will definitely recommend this company*

Olawale Taiwo

*GREAT PEOPLE LITERALLY
GREAT PEOPLE LITERALLY. ONE OF THE BEST IN TERMS OF
SOLAR AND INSTALLATION*

Jack Court

*Some of the most experienced/knowledgeable installers I've met
Did training with them as a Duracell Energy battery manufacturer, super switched on installer company, top notch knowledge of the industry and battery tech, especially large commercial!*

MES – FABRIC MEASURES

MES provides a comprehensive fabric-first approach to home efficiency, offering a full suite of insulation services including cavity, external, internal, and hybrid wall solutions, as well as specialized insulation for lofts, floors, and all roof types.

By combining these structural upgrades with high-performance glazing and modern condensing boiler systems featuring advanced smart controls, we ensure your property retains maximum heat while significantly reducing energy overheads. To complement these efficiency gains, we integrate proactive ventilation measures to maintain optimal air quality and prevent damp or condensation, ensuring a healthy, breathable environment for your home.

ACCREDITATIONS

At MES, we pride ourselves on maintaining the highest industry standards through a comprehensive suite of professional accreditations. Our commitment to quality, safety, and consumer protection is backed by leading bodies, including TrustMark, MCS, and NAPIT, ensuring every installation meets technical benchmarks. From renewable energy excellence with RECC and EPVS to gas safety and robust wall insulation guarantees through Gas Safe and SWIGA, our credentials reflect a business built on transparency and technical expertise. By adhering to PAS 2030 standards and holding safety certifications like CHAS and PQS, we provide our clients with the absolute peace of mind that their projects are in the most capable and compliant hands.

MEET THE DIRECTOR

ZAMEER FARID

With extensive experience in the renewables industry, our Director of MES brings a unique boots-on-the-ground perspective to every project. Having personally managed complex installations, they understand that a successful transition to green tech requires more than just high-end technology. Instead, it requires precision engineering and a deep understanding of the UK's evolving energy landscape.

MEET THE PARTNERSHIP MANAGER

DAVID SKIMMING

We are excited to welcome Dave as our new Partnerships Manager, bringing over 13 years of expertise navigating the landscape of Housing Associations, councils, and Tier 1 contractors. From recruiting senior leaders to negotiating major SHDF, ORP (Wales), and Warm Homes Local Grant partnerships, Dave pairs deep technical knowledge with extensive experience in customer service to ensure a seamless client journey. By championing Maybury's Full House fabric-first approach, he is set to solve the major bugbears Tier 1 contractors face, ensuring high-quality, reliable delivery. As Dave puts it, he is eager to support Maybury's dedication to excellence, while our MD, Zameer, notes that Dave's market insight will be an invaluable asset in strengthening our sector relationships.
