

REIMAGINING KHAYELITSHA

Code: [FK57]

These initiatives seek to improve the quality of life in Khayelitsha by creating a lively, open, and welcoming environment for both locals and tourists.

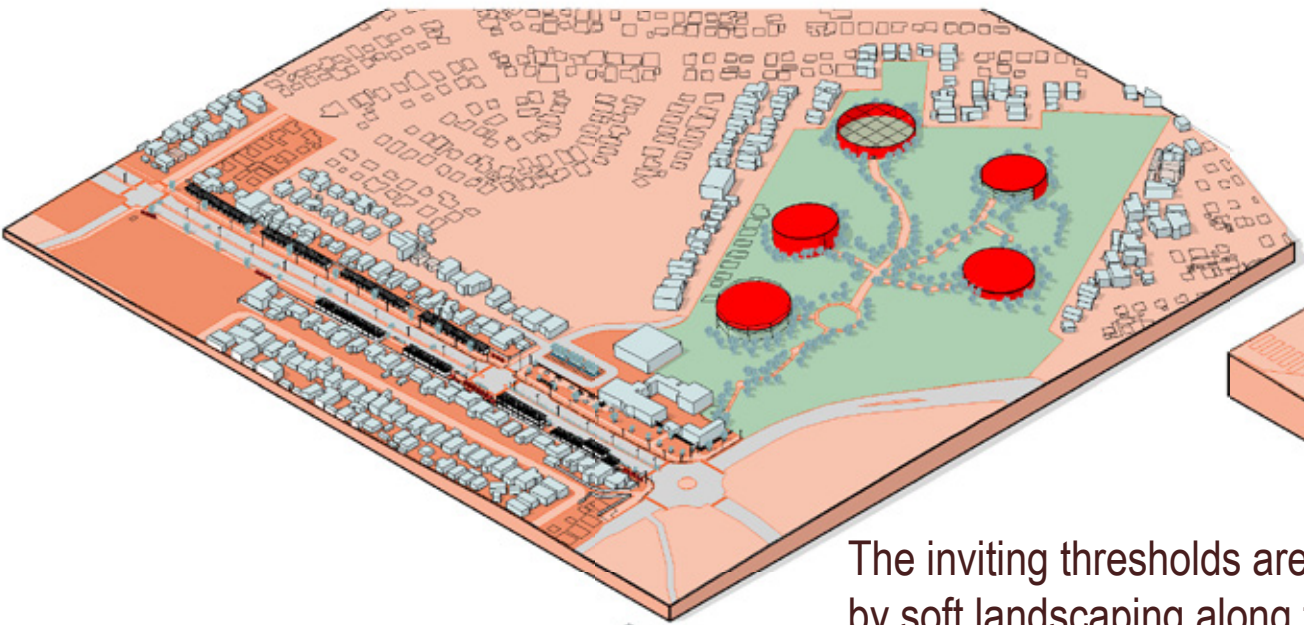

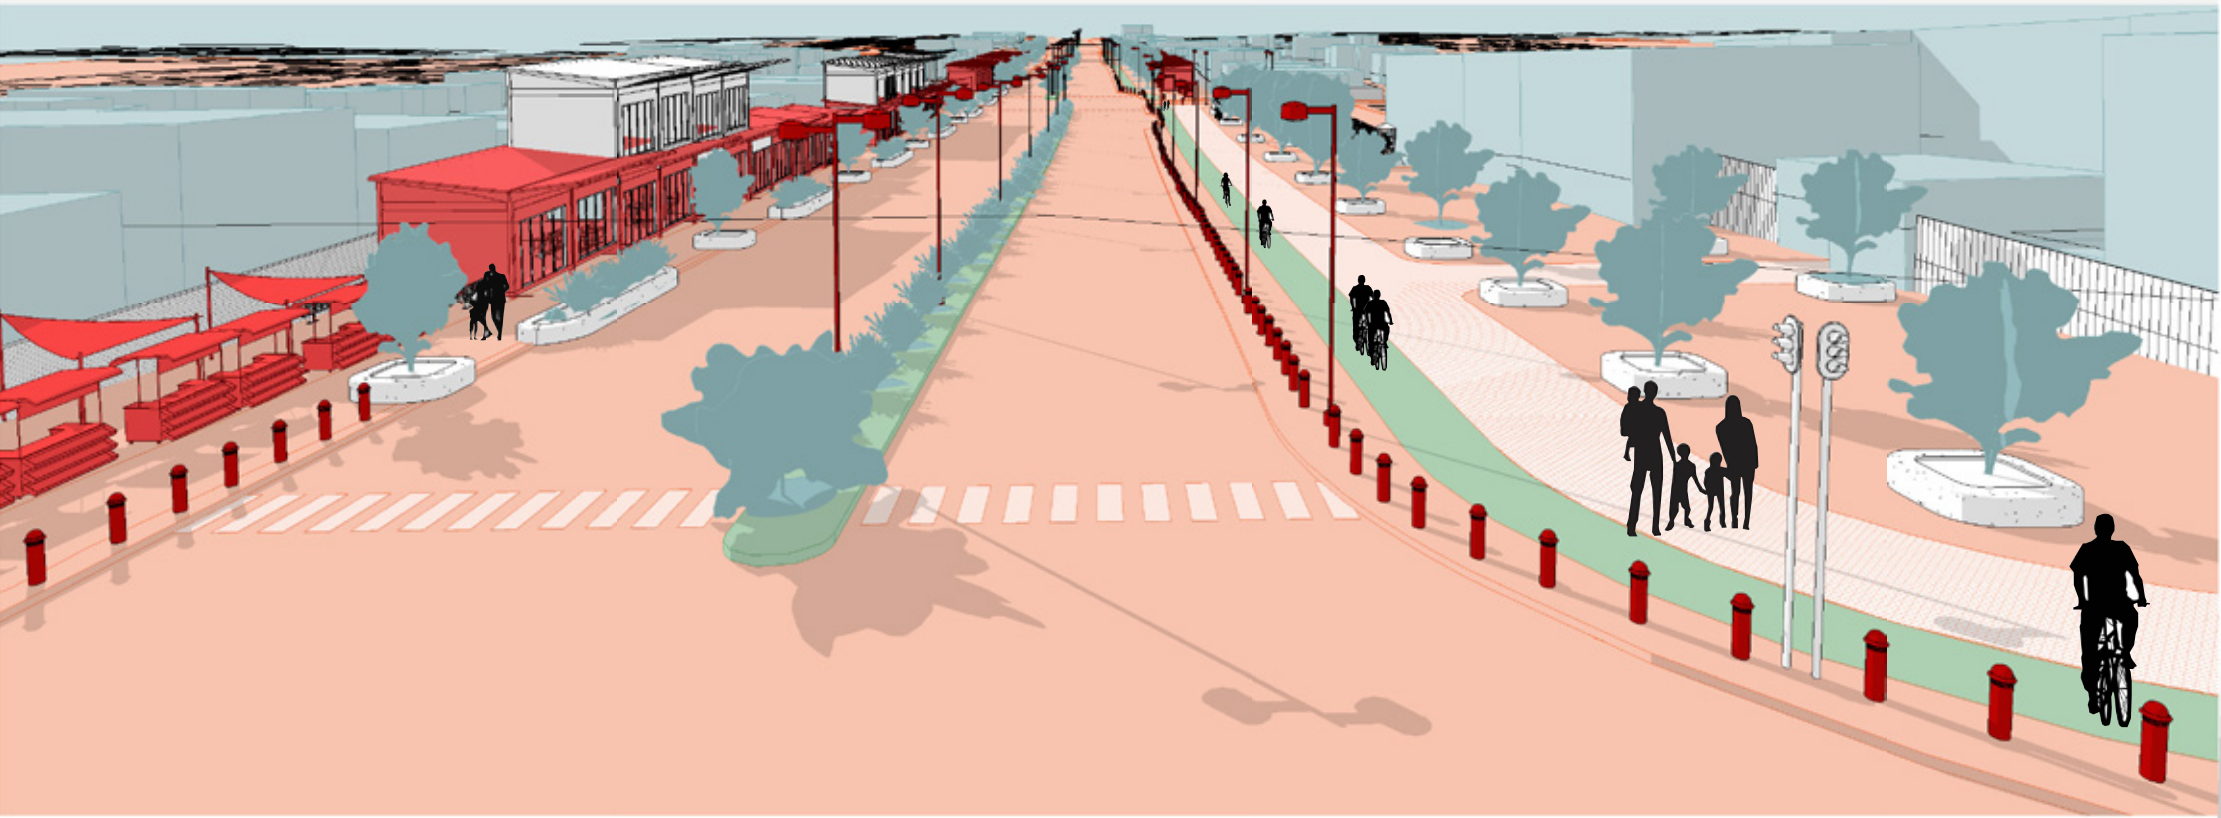

This version focuses on showcasing the connection of public transport, market areas, and recreational amenities with an emphasis on a community-centered approach.

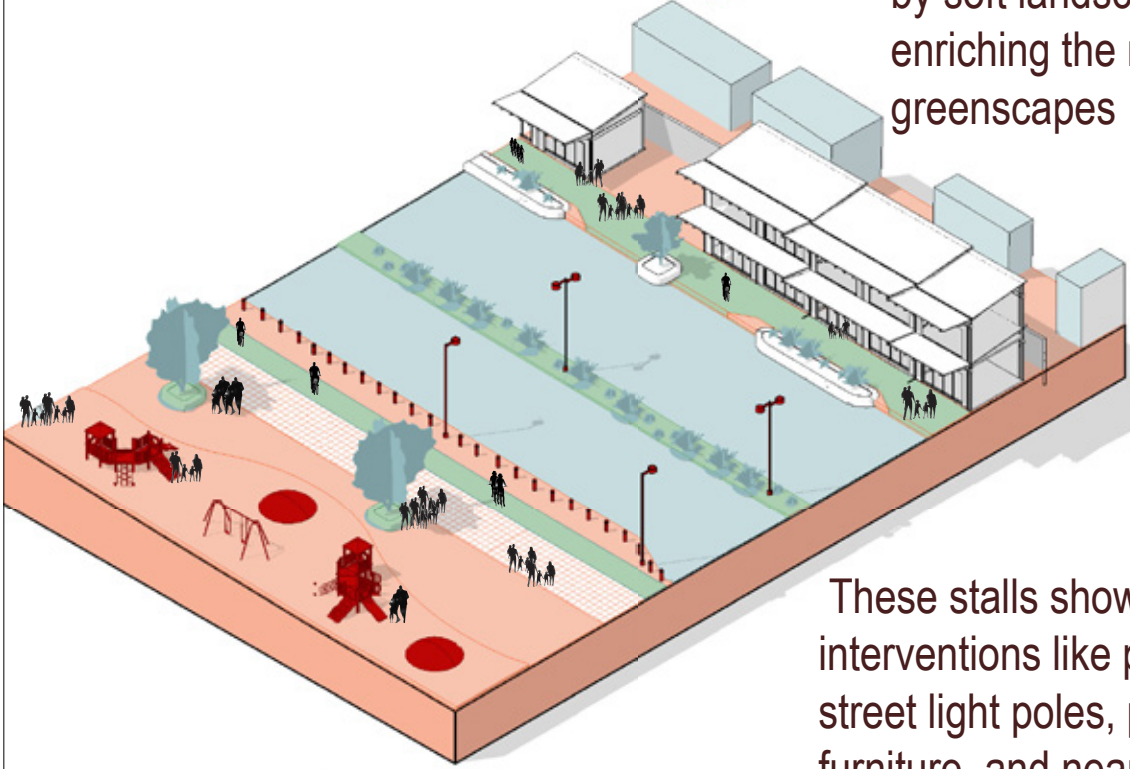

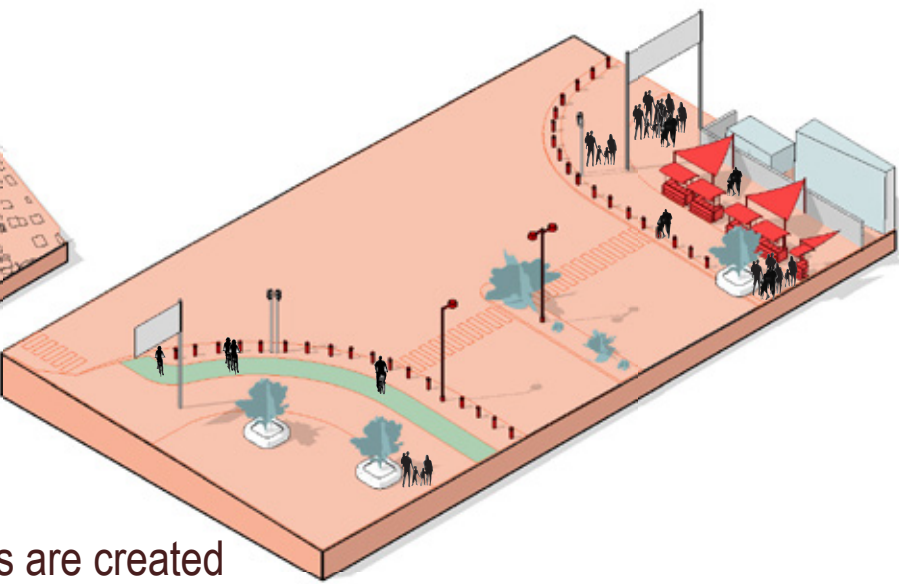

Market Stalls and Module Shop Stalls

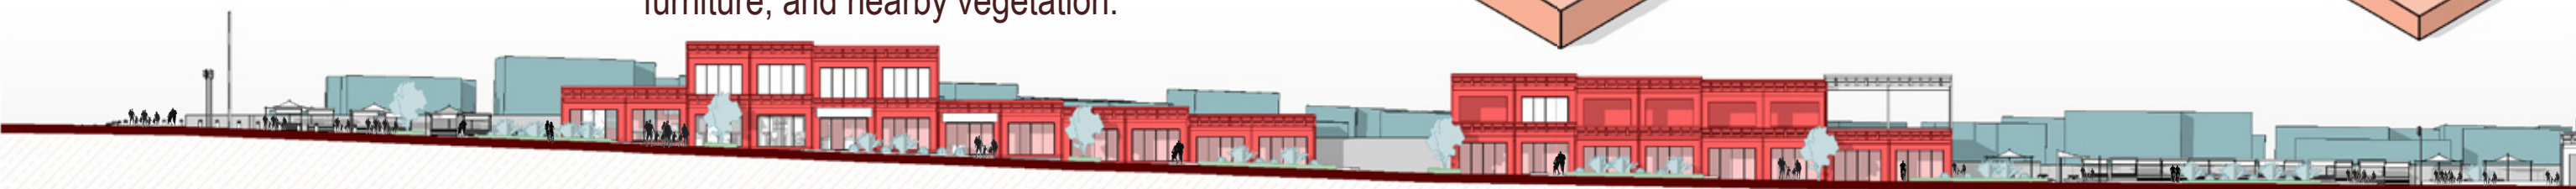

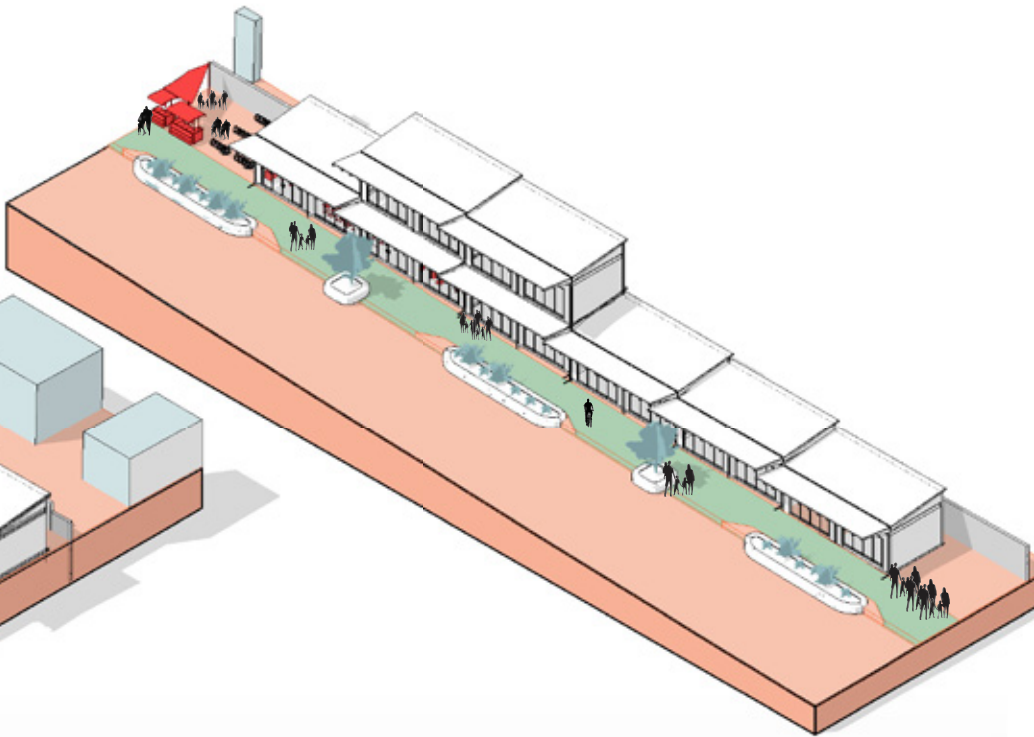

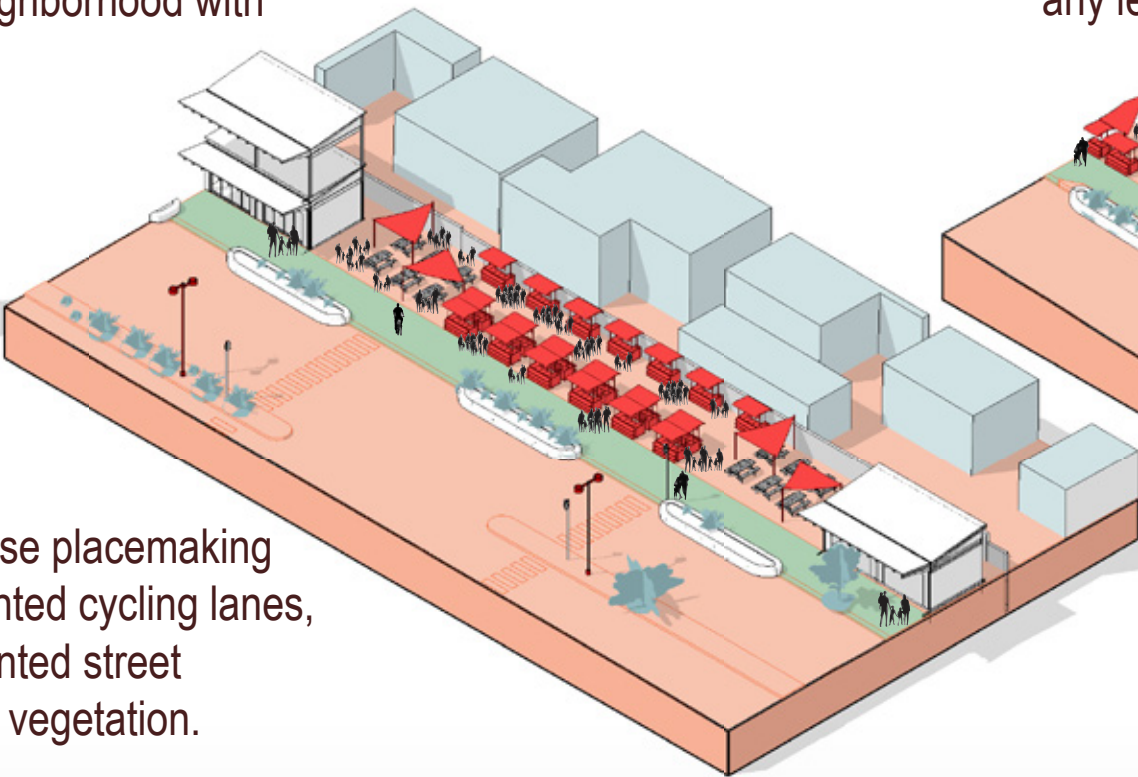

Street vendors can sell their products in an orderly manner at market stalls along Spine Road, free from any legal or development obstacles.

The inviting thresholds are created by soft landscaping along the road, enriching the neighborhood with green spaces

These stalls showcase placemaking interventions like painted cycling lanes, street light poles, painted street furniture, and nearby vegetation.
