Sport Survey

Brian Davies CEO Sport Wales

“

For many years, the School Sport Survey has provided a wealth of information that allows providers such as National Governing Bodies, Sport Partnerships and Local Authorities to understand how children and young people want to be taking part in sport and physical activity.

Through a number of key changes, the 2026 survey promises to be the most insightful yet, giving us all the opportunity to make a real difference in achieving our ambitions of setting every child up to be active and healthy for life.

Crucially, the survey data allows our partners to assess demand and identify how they can make sporting opportunities more accessible and diverse across the country.

Schools who take part in the School Sport Survey will directly benefit from access to their own set of bespoke data which will include details of potential partnership opportunities within their local community so that they can respond better to pupils' wellbeing needs.

School Sport Survey data plays a key role in informing decisions made by Sport Wales and the Welsh Government around investment into sports and vital facilities. Every school that supports the completion of the School Sport Survey is part of a national community helping the drive for young people to be more active. Diolch i pawb.

As always, we are also extremely grateful for the huge amount of support that our Sport Partnership and local authority partners in particular put into the delivery of the School Sport Survey.
