

# REFLECTING BRILLIANCE

*Bespoke Illuminated Mirror Solutions*

**lumos mirrors**

## BRAND INTRODUCTION

# Designed to Complement Your Vision

At LUMOS, we believe that a mirror is never merely a mirror. It is the quiet centrepiece of a considered space — the element that holds light, frames reflection, and defines atmosphere. Our bespoke illuminated mirrors are conceived for designers and architects who refuse to compromise on the finishing details.

We collaborate closely with design professionals across residential, hospitality, and commercial sectors, crafting pieces that respond precisely to the demands of each project. Every dimension, finish, and light tone is available to order, ensuring the final piece belongs to the space as if it were always meant to be there.

# Design Without Compromise

Our philosophy is rooted in the belief that beauty and precision are inseparable. Every LUMOS mirror is approached as a design object in its own right — considered in proportion, finish, and luminosity from the very first sketch.

## Fully Bespoke Sizing

Custom dimensions to fit any architectural specification, from intimate ensuite to grand hotel suite.

## Frame & Finish Options

Brushed brass, matte black, satin chrome, or frameless — each crafted to complement premium material palettes.

## Tailored Light Temperature

Warm, neutral, or cool-white illumination, adjustable to suit the mood and function of each space.

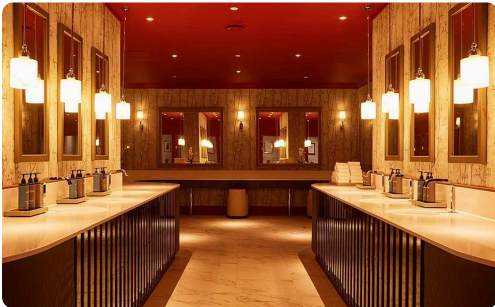

## Collaborative Design Process

Our team works directly with designers from concept to installation, ensuring every detail is resolved before production begins.

HERO COLLECTION

# Illuminated Mirrors

Our flagship range of illuminated mirrors brings together architectural precision and refined craftsmanship. Whether suspended as a statement centrepiece or integrated seamlessly into a vanity wall, each piece is engineered to cast light beautifully — enhancing both the face and the room.

## Hospitality Series

Designed for high-use hotel and spa environments, combining durability with understated elegance.

## Circular Statement

A suspended circular form in matte black — bold yet refined, ideal for luxury residential and boutique hospitality.

## Backlit Frameless

Soft, diffused backlight creates a halo effect against stone and plaster walls — a hallmark of contemporary luxury.

VANITY COLLECTION

# Everyday Moments, Perfected

The vanity mirror is where ritual begins. LUMOS vanity mirrors are designed to elevate those quiet, personal moments — morning routines, evening preparations — with light that flatters and form that endures. Each piece balances practical brilliance with considered aesthetic, making it equally at home in a private dressing room or a five-star suite.

## Tabletop Vanity

Freestanding with an integrated LED ring, designed for dressing tables and boutique hotel vanity areas.

## Full-Border Illumination

An even perimeter glow delivers flattering, shadow-free light — essential for grooming and make-up environments.

## Hollywood Bulb Ring

Individual warm-toned bulbs arranged in a circular frame — a cinematic statement for dressing rooms and suites.

## TECHNOLOGY

# Where Beauty Meets Intelligence

Every LUMOS mirror is engineered with the same care as its aesthetic design. Our integrated technology suite ensures that form and function coexist seamlessly — enhancing the daily experience without intruding on the visual language of the space.

### Touch Controls

Discreet capacitive touch panels allow effortless control of brightness and colour temperature without breaking the mirror's clean surface.

### Anti-Fog Technology

Integrated demister pads maintain a perfectly clear reflection even in high-humidity environments such as bathrooms and steam rooms.

### Adjustable Illumination

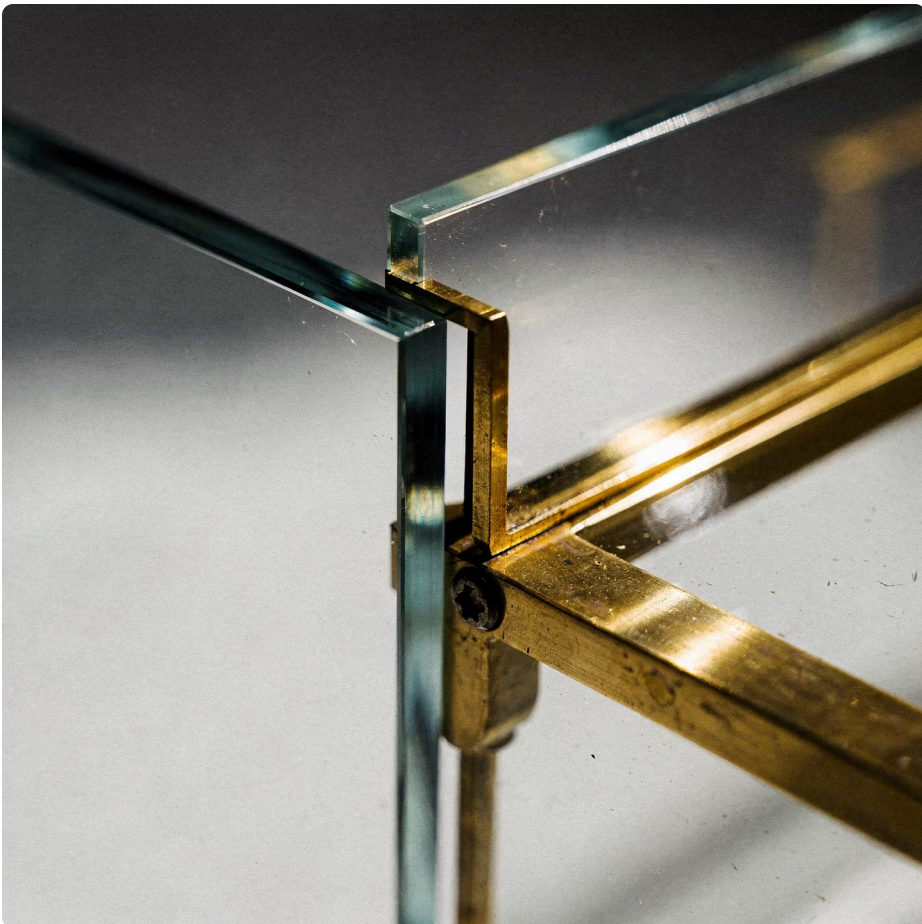

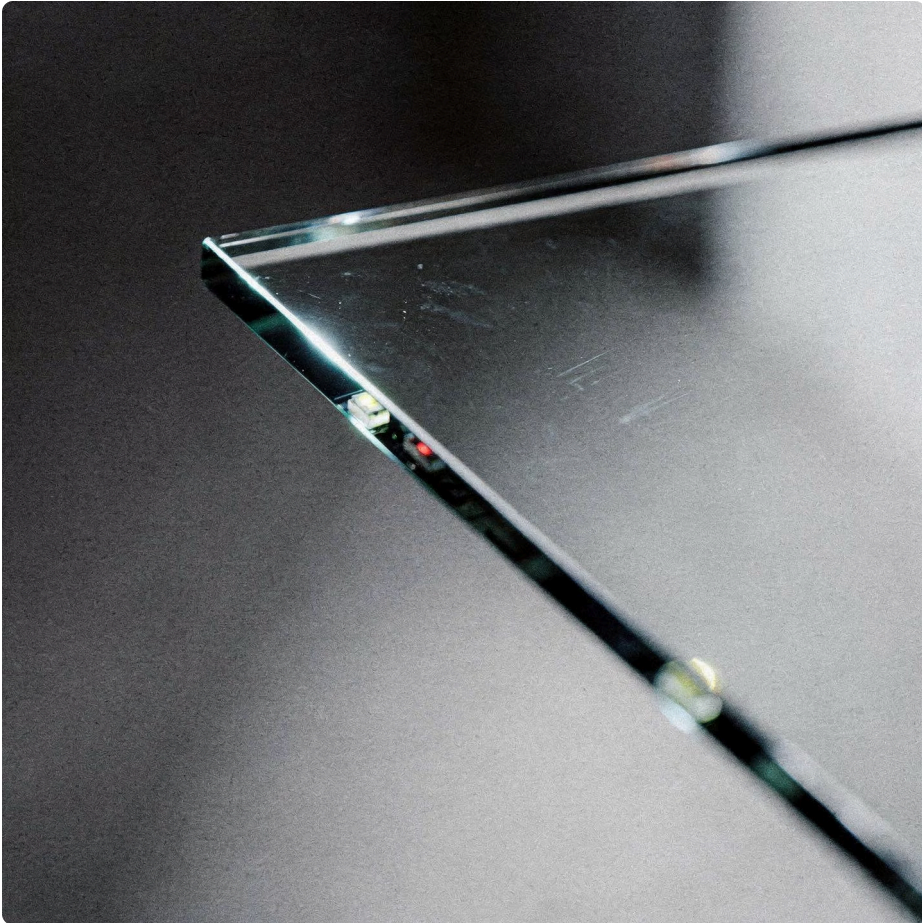

Stepless dimming from 10% to 100% intensity, with selectable colour temperatures from 2700K warm white to 6500K cool daylight.

### Smart Integration

Compatible with leading smart-home platforms, enabling voice control, scheduling, and scene-based automation for residential and hospitality projects.

#### MATERIALS & CRAFTSMANSHIP

## Crafted to Complement Premium Interiors

The materials behind every LUMOS mirror are selected with the same rigour applied to the spaces they will inhabit. We source high-clarity float glass, precision-cut and treated in-house to eliminate distortion. Frames are constructed from solid metals — brushed brass, satin chrome, and matte black steel — finished by hand to ensure consistency across large-format and multi-piece installations.

Our LED modules are commercial-grade, rated to 50,000 hours of continuous use, housed in custom aluminium channels that distribute heat evenly and preserve longevity. This is the craft that lies behind the glow.

## APPLICATIONS

# A Mirror for Every Environment

LUMOS mirrors are specified across a broad range of project typologies — from intimate residential bathrooms to landmark hospitality venues. Our bespoke approach means every environment receives a solution that is precisely resolved.

### Hotels

From boutique properties to international brands, our mirrors define the tone of the bathroom and beyond.

### Residential

Bespoke pieces for private homes, fitted to precise architectural specifications and personal aesthetic vision.

### Spa & Wellness

Humidity-resistant construction and soft warm illumination make LUMOS mirrors an ideal specification for spa environments.

### Commercial

From flagship retail spaces to premium office interiors — wherever refined detailing is required, LUMOS delivers.

# The Standard of Trust

Designers and developers who specify LUMOS do so because the decision is straightforward. Quality, reliability, and creative partnership — delivered consistently, project after project.

1

## Fully Bespoke Output

No standard sizes, no compromise. Every mirror is made to your exact specification — dimensions, finish, light temperature, and mounting solution.

2

## Commercial-Grade Build

50,000-hour LED lifespan, IP44-rated components, and EN-certified electrical systems. Built to perform in the most demanding environments.

3

## Design Consultancy Included

Our specification team works alongside your studio from initial brief through to sign-off, resolving every technical detail before production begins.

4

## Global Delivery & Installation

We ship to projects worldwide, with specialist packing and on-site installation coordination available across major markets.

5

## Aftercare & Warranty

Comprehensive two-year warranty on all components, with extended service agreements available for large-scale hospitality projects.

*"Working with LUMOS was effortless. They understood the project from the first conversation and delivered something that felt entirely of the space."*

— Interior Design Studio, London

# A Partner for Designers

We understand that the relationship between a designer and their supplier is built on trust, responsiveness, and an instinctive alignment of values. LUMOS was founded with that relationship in mind.

## What We Offer Our Design Partners

- Priority access to new collections and prototype sampling
- Dedicated project manager for every specification
- Custom finish matching to material schedules
- NDA-protected bespoke development for exclusive projects

## The LUMOS Commitment

From the first mood board to the final installation, we are present at every stage — not merely as a supplier, but as a creative collaborator invested in the success of your project. We speak your language, respect your timeline, and hold your standard.

# LUMOS

*Bespoke Glass & Mirror Solutions*

---

Designed for those who understand that light is the finest material of all.

# Spacing as a Design Value

White space is not absence — it is a deliberate act of confidence. In both our products and our communications, generous margins and restrained layouts signal quality before a single word is read. The LUMOS approach to spacing reflects a fundamental truth of luxury design: what is left out matters as much as what is included.

## Let Light Lead

In every image and every room, the luminosity of the mirror should be the first thing the eye is drawn to. Arrange all other elements in service of that moment.

## Restrain to Reveal

A single well-placed mirror in a considered space communicates more than a room full of product. Restraint is our most powerful design tool.

## Precision in Every Detail

From the radius of a frame corner to the warmth of a light source, LUMOS obsesses over the details that the untrained eye may never consciously register — but will always feel.

- These design principles apply across all LUMOS-branded materials, presentations, and physical installations. They are the invisible architecture behind everything we make.
