

Nigeria Selected Candidate Proposal

AksumBase Launch Partner Program
Economic proposal and onboarding guide

Program:	AksumBase Nigeria Partner Program
Tracking:	LutinX L.iD presentation code
Training:	Session + blockchain-verifiable BBadge
Legal:	Alloi Sagl - Vezia, Switzerland

SELECTED CANDIDATE

NIGERIA LAUNCH PROGRAM

1. Executive Summary

This document is designed for the private AksumBase Nigeria selected-candidate landing page. It summarizes the economic proposal, onboarding requirements and acceptance conditions for candidates invited to start the AksumBase Launch Partner process in Nigeria.

The mission is direct: selected candidates help real estate agents, landlords, developers and property owners publish valid properties for free on AksumBase.com. Candidate performance is measured by verified registrations and valid properties attributed through the candidate's LutinX L.iD presentation code.

Core offer	Selected candidates can start as Launch Partners, prove results and compete for the Country Manager path.
Tracking model	Each candidate receives a LutinX L.iD presentation code used to attribute registrations and property submissions.
Training model	Every candidate receives an onboarding training session. After completion, a blockchain-verifiable BBadge confirms the skill acquired.
Recognition model	Public recognition may be given for milestones such as 50, 100, 250 and 500 valid properties.
Economic logic	Fixed compensation plus performance bonus and milestone bonuses. Only approved, valid and unique properties count.

Important: this proposal is a preliminary commercial offer and does not replace the final written agreement. Compensation is subject to validation of results, written approval, local compliance, tax treatment and final confirmation by AksumBase.

2. Nigeria Salary Benchmark and Positioning

The proposed economic package is intentionally aggressive because AksumBase is asking candidates to build measurable market traction quickly. The compensation design uses a moderate entry fixed amount, strong variable upside and a Country Manager path aligned with business-development responsibility.

Benchmark	Current reference	How it informs the proposal
Business Development Manager salary range	Paylab reports a gross monthly range of NGN 198,658 to NGN 1,892,402 for Business Development Manager in Nigeria.	The Launch Partner fixed amount starts near the lower professional benchmark, while Country Manager compensation moves toward senior commercial levels.
National minimum wage context	Nigeria minimum wage is reported at NGN 70,000 per month in 2026, unchanged from 2025.	The proposal is positioned far above minimum wage and linked to measurable output.
Currency context	Recent public FX data places USD/NGN around NGN 1,363-1,375 per USD in late May 2026.	USD equivalents are indicative only and should not be used as guaranteed payment values.

Indicative conversion used in this document for context only: 1 USD approximately NGN 1,370. Actual payment values should be stated and settled in the final contract currency.

3. Economic Proposal

The proposal combines a fixed component, a property-based bonus and milestone incentives. This creates a strong launch incentive while protecting AksumBase through quality validation.

Phase	Role	Fixed Compensation	Performance Bonus	Promotion Gate
Training	Certified Candidate	Training session	BBadge after completion	L.iD presentation code activated
Days 1-30	Launch Partner	NGN 250,000	NGN 2,500 per valid property + NGN 150,000 milestone at 100 valid properties	Quality verified; no duplicate or fraud pattern
Days 31-90	Country Manager Candidate	NGN 500,000 per month	NGN 3,000 per valid property + milestone bonuses	250+ valid properties and strong local relationships
After 90 Days	Country Manager	NGN 1,000,000 per month	Team override + quarterly KPI bonus	500+ valid properties, reliability and leadership

Commercial note: All amounts are proposed commercial terms and may be adjusted by AksumBase before the final written agreement. Bonuses are payable only on valid, unique and approved properties attributed to the candidate through the LutinX L.iD presentation code or approved candidate-specific tracking link.

4. Potential Earnings Examples

The scenarios below show how the proposal can become highly attractive for candidates who execute quickly and maintain quality. They are not guaranteed results; they are examples based on the proposed formula.

100 valid properties NGN 650,000 NGN 250,000 fixed + NGN 250,000 variable + NGN 150,000 milestone	250 valid properties NGN 1,500,000 NGN 500,000 fixed + NGN 750,000 variable + NGN 250,000 milestone	500 valid properties NGN 2,750,000 NGN 500,000 fixed + NGN 1,500,000 variable + NGN 750,000 milestone
--	--	--

Scenario	Approx. USD Equivalent at NGN 1,370/USD	Notes
NGN 650,000	Approx. USD 474	Example first 30-day success case at 100 valid properties.
NGN 1,500,000	Approx. USD 1,095	Example Month 2 or 3 result at 250 valid properties.
NGN 2,750,000	Approx. USD 2,007	Example high-performance Month 2 or 3 result at 500 valid properties.

5. What Counts as a Valid Property

Compensation is calculated only on properties approved by AksumBase. The purpose is to reward real market growth, not incomplete or unverifiable submissions.

Valid property requirement	Explanation
Property type	Apartment, house, land, commercial, office, development unit or other accepted category.
Location	City, neighborhood or accurate area details sufficient to identify the asset.
Sale or rent status	Clear indication whether the property is for sale, rent or both.
Price or expected price range	The listing must include a price or approved negotiable range.
Description and key features	Rooms, size, amenities, building status, land size or relevant commercial details.
Photos or photo collection plan	Images must be available or a collection workflow must be agreed.
Agent or owner contact details	Validated contact details for the party authorized to represent the property.
Permission to publish	The submitter must be the owner or authorized representative.

Rejected or non-counting results	Reason
Duplicate listings	Properties already counted under another candidate or already present on the platform.
Fake or unverifiable properties	Submissions that cannot be validated through contact, ownership or market checks.
Listings without permission	No valid authorization from the owner, agent, landlord or developer.
Incomplete or misleading data	Missing core fields or materially inaccurate information.
Wrong attribution	Properties connected to another L.iD presentation code or unsupported tracking path.
Quality issues after publication	Listings removed during the quality-control window may be excluded.

AksumBase may apply a quality holdback until listings remain active and compliant for 30 days.

6. Step 1 - Create or Confirm Your LutinX Account

To activate candidate tracking, each selected candidate must create or confirm a LutinX account. This allows AksumBase to assign a LutinX L.iD presentation code and connect candidate activity to verified registrations and property submissions.

Step	Action
1	Go to https://lutinx.com/login
2	Create a new account if you do not already have one.
3	Register using the same email address submitted to AksumBase.
4	Complete your profile information and confirm your email address.
5	Keep your login details safe and do not share them with other candidates.
6	Return to the Nigeria selected-candidate page and confirm your LutinX account email.

Link: <https://lutinx.com/login>

7. Step 2 - Understand the LutinX L.iD Presentation Code

Your presentation code is your personal AksumBase tracking code inside the LutinX L.iD system. It identifies the registrations and property submissions generated through your activity.

Tracking principle	Candidate instruction
Unique code	The code is assigned to one selected candidate and must be used only for authorized registrations.
Registration attribution	Agents, landlords, developers and owners must register using the candidate presentation code or candidate-specific link.
Property attribution	Properties submitted through a tracked registration can be reviewed and counted for the candidate.
Quality validation	Only valid and approved properties generate performance results.
Anti-confusion protection	The code protects both AksumBase and candidates by avoiding attribution disputes.

1	Candidate receives code
2	Candidate shares approved link/code
3	Agent or owner registers
4	Property is submitted
5	AksumBase validates
6	Approved result is counted

Warning: Do not share another candidate's code. Do not submit properties without authorization. Any manipulation, fake listing or duplicate activity may cancel the result and terminate the collaboration.

8. Step 3 - Initial Training and BBadge

Before starting the campaign, every selected candidate must attend an initial training session. The training explains how AksumBase works, how to approach agents and owners, how to collect listing information, how to use the L.iD presentation code and how quality control works.

Training topic	Purpose
AksumBase platform overview	Understand the real estate platform and the free publishing offer.
Candidate role and responsibilities	Clarify what candidates can and cannot promise in the market.
LutinX L.iD presentation code	Learn how tracking works and how registrations are attributed.
Property data collection	Learn which data fields are mandatory for valid listings.
Quality control and approval rules	Avoid rejected listings, duplicates and unauthorized submissions.
Communication scripts	Use clear messages for agents, developers, landlords and owners.
Performance dashboard and recognition	Understand result milestones and public recognition levels.

BBadge outcome: after completing the training activity, the candidate receives a blockchain-verifiable BBadge confirming the new skill acquired.

Suggested BBadge title: Certified AksumBase Launch Partner - Nigeria

9. Public Recognition Path

Milestone	Recognition Level	Possible recognition
50 valid properties	Starter Recognition	Internal mention and candidate status update.
100 valid properties	Launch Builder	Public LinkedIn or AksumBase communication mention.
250 valid properties	Area Leader	Priority evaluation for local coordination role.
500 valid properties	Country Manager Candidate	Public recognition and Country Manager evaluation.

Recognition may include LinkedIn announcements, leaderboard mentions, BBadge visibility, official AksumBase communication and priority evaluation for a management role.

10. Candidate Acceptance Checklist

The private landing page should collect the candidate's acceptance and operational readiness before activation.

Acceptance item	Candidate confirmation
Economic proposal reviewed	I confirm that I have read and understood the AksumBase Nigeria economic proposal.
Written agreement required	I understand that this document does not replace the final written agreement.
Valid results only	I understand that compensation is based only on valid, unique and approved properties.
L.iD tracking	I agree to use my LutinX L.iD presentation code correctly and only for authorized registrations.
No fake or duplicate listings	I confirm that I will not submit fake, duplicate, misleading or unauthorized properties.
Training required	I agree to attend the training activity before starting the campaign.
Tax and compliance	I understand that payment is subject to tax treatment, local compliance and written approval.

11. Candidate Acceptance Form Fields

Field	Purpose
Full Name	Identify the selected candidate.
Email	Candidate communication and agreement reference.
WhatsApp Number	Operational contact.
City / Area in Nigeria	Candidate market coverage.
LutinX Account Email	Account matching and presentation-code activation.
Acceptance status	Yes, I accept / I need clarification / No, I do not accept.
Preferred start date	Operational planning.
Preferred training date and time	Training scheduling.
Message / Notes	Candidate comments or clarifications.

Primary landing page CTA: I Accept and Want to Start

Post-submit message: Thank you. Your acceptance has been received. AksumBase will confirm your LutinX L.iD presentation code, training session and next operational steps.

12. Operational Start Plan

Phase	Action	Owner
Selection confirmed	AksumBase sends private page link and proposal PDF.	AksumBase
Account creation	Candidate creates or confirms LutinX account.	Candidate
Presentation code	AksumBase assigns the candidate L.iD presentation code.	AksumBase
Training scheduled	Candidate submits preferred training availability.	Candidate + AksumBase
Training completed	Candidate attends the session and receives BBadge.	AksumBase
Campaign starts	Candidate begins contacting agents, landlords, developers and owners.	Candidate
Quality review	AksumBase validates listings and updates candidate results.	AksumBase

13. Legal and Commercial Notes

AksumBase legal data:

Alloi Sagl
via San Gottardo 9
Vezia, Switzerland

This document is a commercial proposal for selected candidates. It is not an employment contract, agency agreement, partnership agreement or guarantee of appointment as Country Manager. Any final engagement must be confirmed by a separate written agreement approved by AksumBase / Alloi Sagl and, where applicable, aligned with local legal, tax and compliance requirements.

AksumBase may reject, suspend or remove results connected to fake, duplicate, incomplete, misleading or unauthorized listings. AksumBase may also suspend a candidate code if quality, fraud, compliance or reputational risks are detected.
