

Softline[®] Ipe

Latin name: Tabebuia spp

Country of origin: South America

Density: 1040 Kg / cu m

Hardness: Very hard

Stability: Medium

Formats:

20 x 100 x 2400-2000 mm
(main length)

Description:

Well defined sapwood (3 to 9cm)

Heartwood: yellow brown to yellow olive, sometimes dark red, lightly grained

Grain: straight to occasional cross-grain and deposits of yellow green flecks

Physical characteristics:

Density at 12% (Kg/cu m) MV12 : 1040

Volumetric shrinkage for 1% of moisture v% = 0.68

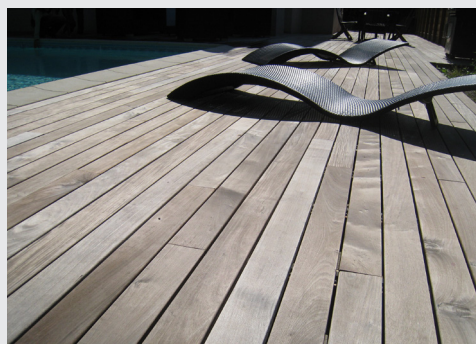

Notes:

High natural durability

Not vulnerable to lyctus beetle attack

Low impregnability

Ideal for outdoor construction

Softline[®] : Ipe
