

Softline[®] Padauk

Latin name: Pterocarpus spp

Country of origin: Cameroon, Gabon

Density: 770 Kg/cu m

Hardness: Hard

Stability: Small movement

Formats:

20x100x2400-2000 mm
(main length)

Description:

Sapwood whitish, very distinct

Heartwood: red with occasional coral color with brown darker veins when exposed to the light

Sporadic discolouring which doesn't lead to any deterioration of the wood quality

Grain: straight with light cross-grain

Physical characteristics:

Density at 12% (Kg/cu m) MV12: 770

Volumetric shrinkage for 1% of moisture v% = 0.43

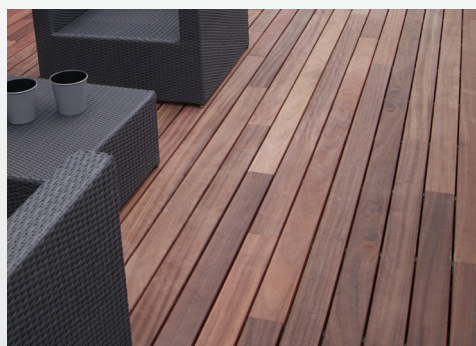

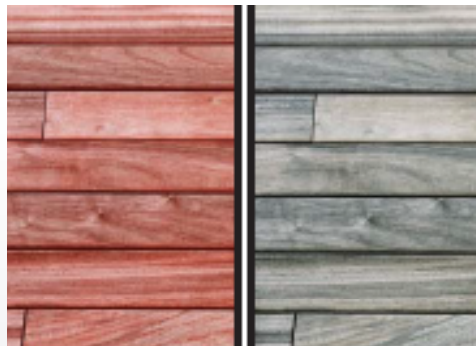

Notes:

Exceptionally high durability

Not vulnerable to lyctus beetle attack

Low impregnability

Ideal for nautical constructions
