

Softline® Teak

Latin name: Tectona grandis

Country of origin: Asia

Density: 650 Kg/cu m

Hardness: Semi-Hard

Stability: Small movement

Formats:

20 x 96 x 2400-2000 mm
(main length)

Description:

Sapwood: greyish in colour

Heartwood: in general straight grain with occasional flaring and black veining typical of the wood

Grain: usually straight, with occasional flaring and black veining typical of the wood

Quite oily in touch

Physical characteristics:

Density at 12% (Kg/cu m) MV 12: 650

Volumetric shrinkage for 1% of moisture $v\% = 0.34$

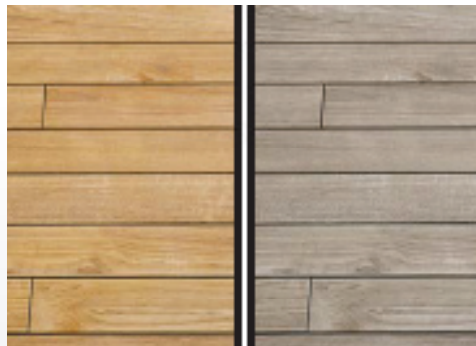

Notes:

Excellent durability

Not vulnerable to lyctus beetle attack

Low impregnability

Ideal for nautical constructions

Softline® : Teak
