

Readers

Robust, Zinc Plated Steel Reader Posts in Multiple Sizes

Barrier, gate and communications controls require sturdy, all-weather housings. Our reader shelters equipment with a protective, cast shroud.

TURNING, HEIGHT, LANE WIDTH

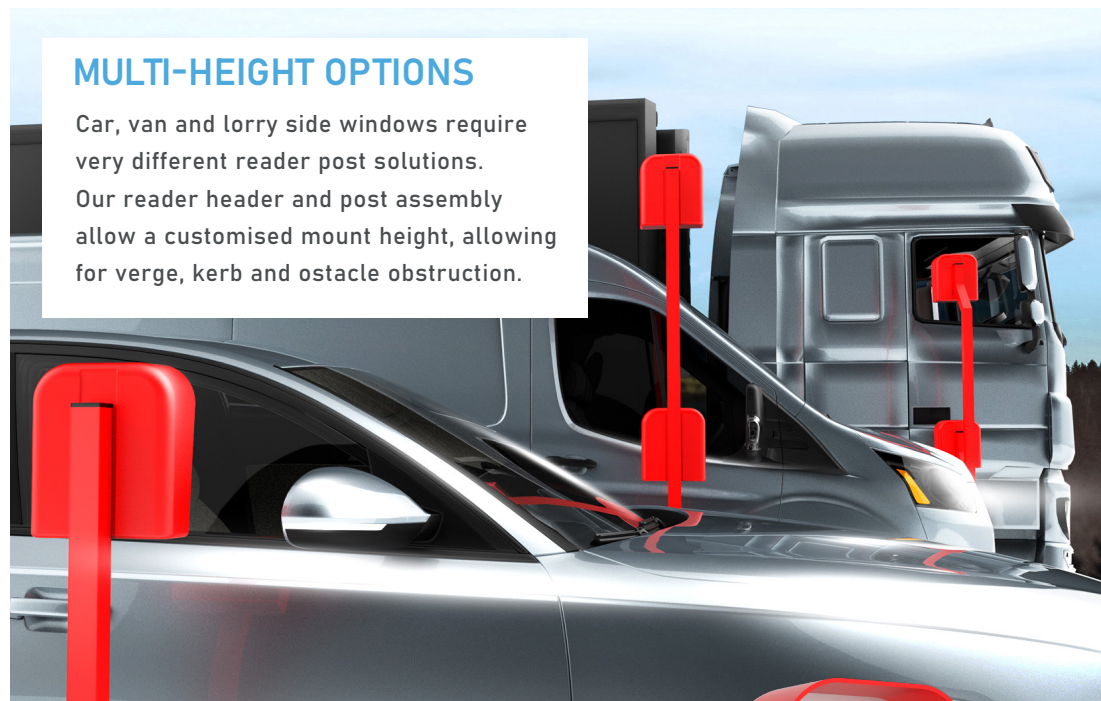

Selecting the correct reader post and header is vital with the huge variety of site access requirements. Headers can be mounted at customised height, and where posts have to be away from a roadway, a swan neck configuration bridges the gap. PSE reader solutions always fit the job.

Allowing the installer to mount a wide array of access security equipment, our reader system is extremely versatile in height, reach, colour and size.

MULTI-HEIGHT OPTIONS

Car, van and lorry side windows require very different reader post solutions. Our reader header and post assembly allow a customised mount height, allowing for verge, kerb and obstacle obstruction.

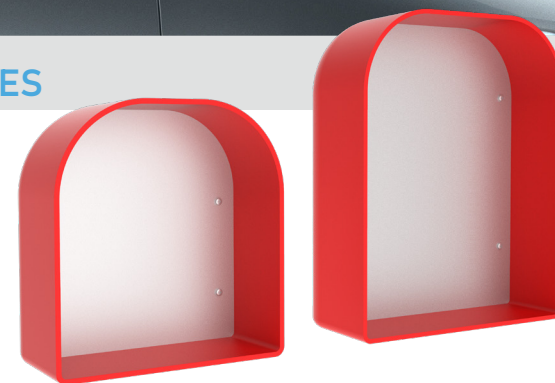

ANY RAL COLOUR

We carry standard RED RAL 3020 stock but can cater for specific codes to suit your site requirements for both the reader headers, posts and bases.

STANDARD AND XL SIZES

Keypads, RFID and intercoms can vary in size and often several are needed together. An extra large reader is the answer, offering a larger stainless steel face area to mount your equipment.

Standard reader

Extra large reader

Readers

Allowing the installer to mount a wide array of access security equipment, our reader system is extremely versatile in height, reach, colour and size. Pre-drilled holes, gusseted base and cast-in bosses enable easy installation.

CE APPROVED

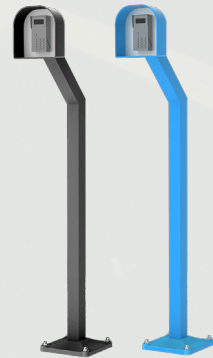

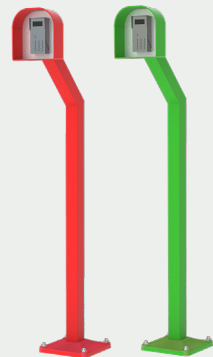

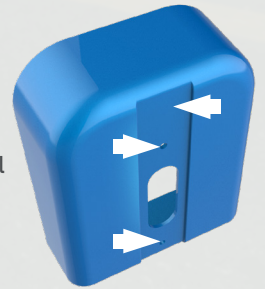

PLATE STAND-OFF BOSSES

Mounting plates are screwed into four bosses which stand off from the reader, creating a void behind the plate to enable componentry or cabling.

LARGE CABLE ENTRY

A large cable entry port allows easy cable feed into the post. Either side are two mount holes. A channel shape on the reverse allows a centralised mounting every time.

SPECIFICATION

LEGISLATION

CE approved

COLOURS

Any standard RAL colour
RAL 3020 RED kept in stock

FINISH

Zinc primed & powder coated

CONSTRUCTION

Steel post, aluminium cast base and header

FIXINGS
