Once you open the link toGPT, here's what to do:

Step 1: When it opens, click “Save” or “Keep” at the top so it stays under *Your GPTs* inside ChatGPT. That way, you don't have to find the link again later.

Step 2: When you're having a conversation with Talk2Cash, stay in the same chat if you're continuing on that topic. If you start something new, that's when you can open a new chat.

Step 3: Each time you start a new thread, rename it right away so you can always find it again on the left-hand side of your screen.

You can name your chats like this:

- **Talk2Cash: Getting Started / Structure**
- **Talk2Cash: Visibility / Interviews**
- **Talk2Cash: Fast Path to Cash**
- **Talk2Cash: Let's Go / Challenges / Marketing**

That way, if you ever want to go back and pick up where you left off, you'll know exactly which conversation to open.

Until one is committed, there is hesitancy, the chance to draw back...
Concerning all acts of initiative (and creation), there is one elementary truth, the ignorance of which kills countless ideas and splendid plans: that the moment one definitely commits oneself, then Providence moves too. —
W.H. Murray, often attributed to Goethe
