

SAVANNA Luxury Tents & Habitats

SAVANNA Luxury Tents & Habitats

Savanna Frontier Collection — The Savanna Luxury Tents & Habitats Frontier Collection is a new class of mobile wilderness architecture — engineered for lodge operators, conservation estates, and remote-site developers who need premium accommodation without permanent impact on the land.

Each Frontier unit is fully mobile, modular, and environmentally non-invasive, allowing you to install, expand, uplift, or relocate your lodge footprint with absolute freedom.

Crafted with engineered steel connectors and precision timber interfaces, the Frontier Collection assembles quickly, operates elegantly, and disappears without a trace. No concrete.

No foundations. No civil works. Every structure can be broken down, packed, and transported to a new site, empowering operators to adapt to seasonal demand, wildlife movement, or evolving master plans — while maintaining a luxury guest experience.

Why Frontier Exists The modern lodge operator needs agility. Land leases shift. Wildlife corridors evolve.

Tourism demand fluctuates. Traditional construction locks you into a fixed footprint — but Frontier gives you strategic mobility, financial efficiency, and environmental responsibility without compromising luxury.

Frontier is not a tent. It is a mobile habitat system.
