Luxury Tents & Habitats

Horizon Collection

The Horizon Collection reflects the practical heart of Savanna Luxury Tents & Habitats — an honest, grounded expression of wilderness living crafted for destinations that value comfort, simplicity, and a strong connection to the landscape.

Designed for forward-thinking developers, conservation-minded owners, and operators seeking dependable, efficient accommodation, this collection blends thoughtful architecture, smart engineering, and a respect for the natural environment.

Each habitat is shaped as a seamless, functional extension of its surroundings: elevated where needed, light-touch in its footprint, and carefully detailed to deliver a reliable 3-star guest experience that feels welcoming, intuitive, and connected to place.

With the Horizon Collection, we introduce a new standard of essential wilderness comfort — where form follows function, where nature informs every decision, and where materials and lines are shaped by clarity, durability, and ease. This is more than a practical offering. It is an opportunity: to support your guests, strengthen your property, and redefine what accessible wilderness hospitality can be.
