

7/15/2026

Dear prospective donors,

Lighthouse Residential Services, Inc is a non-profit organization dedicated to supporting men and women through our housing programs. We currently offer up to 16 beds between two locations in the Houston, TX area. Our sober living home for men provides residence, structure, computer based job training and certifications, substance accountability through testing with substance group support meetings, and case management. Our program also includes a community service commitment which aims to rehabilitate any member over the course of their 12-month re-launch preparation.

Our faith-based, veteran owned, sober living home environment offers traditional Alcoholics Anonymous and Narcotics Anonymous group support programs but also innovative trigger management. The facility offered was formerly a home for entertaining with two built in bars. These bars are now used by residences to retrain their minds that even being in a bar with an around others does not require problematic substances.

Lighthouses' current community service commitment is neighborhood watch which joined with trigger management will retrain residence to take responsibility for the community around them building their ethical constitution to be applied in other areas of their life such as making the proper decision not to drink and drive. In addition, residence will engage in self governance pursuant to National Alliance for Recovery Residences (NARR) standards of which our administration is certified by Texas Recovery-Oriented Housing Network (TROHN).

We operate a 12-bed sober living home for men, and a 4-bed facility as shelter for female victims of domestic violence using the same programs with the exception of community service commitments or trigger management. We look ahead to the re-appropriation of a 3rd property available to the firm increasing our capacity an additional 10-beds for sober living dedicated to women. Future acquisition growth plans include a former assisted living facility expanding the services we're able to offer.

To reach our funding goal we are raising \$500,000.00. The funds will be used as follows: \$192,000.00 covers the cost of service per year of our 16 residences, \$20,000.00 will be used to furnish our 3rd project and make suitable as a group home, \$185,000.00 will be used to acquire our 4th project with remaining \$103,000.00 to make some minor updates to that acquisition.

We sincerely hope you consider joining us in our mission to rebuild lives in the State of Texas.

Respectfully,

Brandon Evans
