

Close the Gap

I have been a distance runner for more than a decade now. The phrase “Close the Gap” has been yelled at me more times than we can count.

Integration of this philosophy can fix the decline of mathematics in America today. We struggle and fall behind, yet we can truly catch back up and succeed.

My Qualifications

Below are the ballpark courses I’ve taken and excelled in. If you or a student you know needs any assistance in any of the courses named below, please take your time to reach out to me at any time.

High School

Algebra I & II
Geometry
Trigonometry
AP Calculus

King’s College

Calculus I, II, & III
Statistics I, II, & III
Linear Algebra
Real Analysis
Logic and Axiomatics

“Who are you?”

I’m an aspiring math teacher heading into my final year at King’s College. Teaching and tutoring mathematics is my passion that I wish to share with America. Like every year, I reach out to patriots and learners like you, to assist students struggling in Mathematics and preparing for college.

Past students

Tutoring would be charged by the hour, including half hour increments. The base charge is \$35 per hour. Many students only need 3-5 hours a week.

I always ask my employers to give their opinion on my losses. Very little students have said that my service was not worth the price. My students all went off to their colleges and flourished into great thinkers of America.

“I don’t think I could have done it without your encouraging words :))”

-Von Woodson (12th Grade Trigonometry)
Attending Ursinus College of Liberal Arts

“Thank you for being such a great teacher :)”

-Brooklyn Weber (College Prep Calculus III)
Attending Cornell University for
Mechanical Engineering

Some of my largest supporters and Sponsors:

- Miss. Emma Bealla (WVW)
- Dr. Sunny Weiland (King’s College)
- Dr. Andrew Wojcik (King’s College)

More About me

The QR code provided will direct you to my website and portfolio. There you can convince yourself that I am a professional and dependable tutor for your AP Calculus Course.
