ANDON TOOL
andontool.com

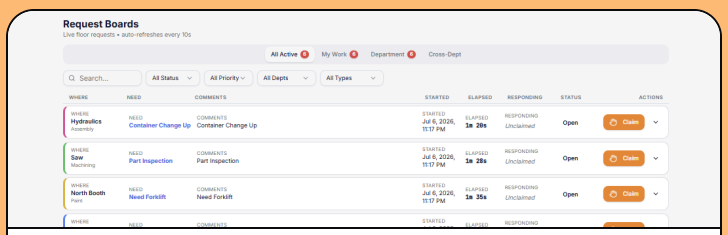

The right communication, to the right place.

Real-time floor requests, scheduling, and KPI boards.

BUILT BY A CI COORDINATOR

Designed by someone who lived the problem, with production in mind.

WHAT YOU GET

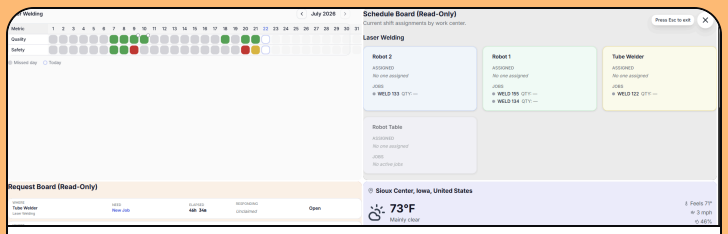

Andon Request Board

One tap from the floor puts a request on the board, claimed by name, with response and completion times captured automatically.

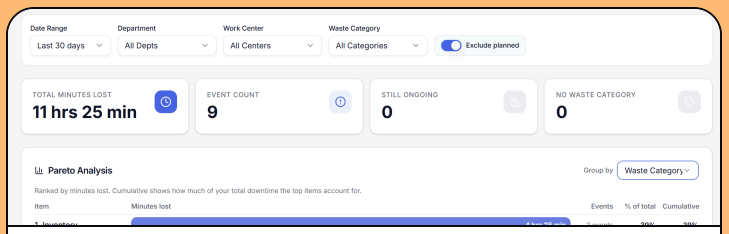

Production Scheduling

Set a rotation once and the board advances it every night — floaters, swaps, and plant-wide Eagle View included.

KPI Boards & TV Dashboards

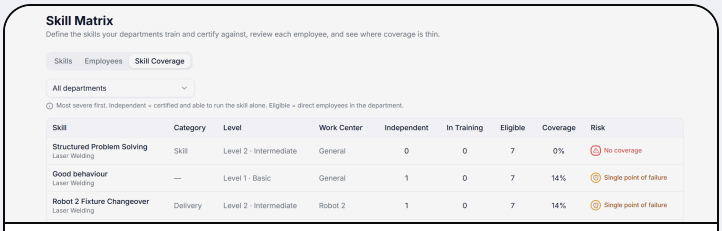

Daily green/yellow/red against your own criteria, then split a floor TV into tiles — KPIs, requests, schedule, weather, your own documents — readable across the room.

Downtime Tracking

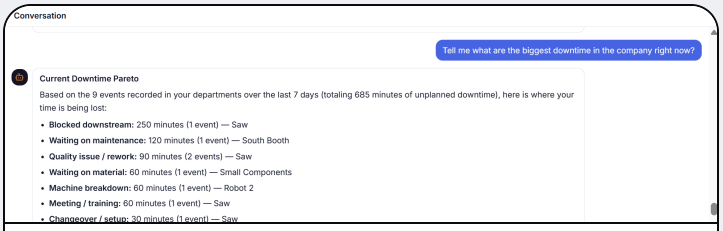

Log every stoppage by category and work center, then see a live Pareto of where your minutes go — so you fix the biggest losses first.

ADD ONS

Skill Matrix

See who is trained on what by work center, with coverage percentages that flag single points of failure before they cost you a shift.

C.I.B.

Every other AI assistant asks you to describe your plant. C.I.B. already knows it.

REGULAR
$300/mo
or $3,000/yr + $800 Launch & Success

ENTERPRISE
$600/mo
or $6,000/yr + $1,200 setup

No contracts. No per-user pricing.
No hardware. Scheduling and KPI boards included in every plan.
