

SPARKSTAR

THE GALACTIC SPARK SCAN CHALLENGE

A Fun, Family Awe-Venture from SparkStar & Global Galactics

This Christmas, SparkStar discovered something surprising: **Holiday magic doesn't just come from decorations—it comes from awe.** And when Willowby-by-the-Bay lost its wonder, the town Christmas tree went dark!

Now your family gets to help bring the sparkle back with a simple, fun, no-cost activity using the camera on your phone or tablet. No apps needed—just curiosity and togetherness.

HOW IT WORKS

Your device becomes a **Galactic Spark Scanner**—a tool SparkStar “sent” to help your family find hidden Awe Sparks. Together, you’ll capture three special photos:

1. LOOK UP Spark

Take a picture of something magical above you: Christmas lights, moonlight, cloud shapes, treetops, snowflakes—anything that makes you say “wow.”

2. LOOK AROUND Spark

Snap a moment of connection or kindness: A sibling helping, family laughter, a neighbor’s décor, someone sharing cocoa. It’s all about noticing the people who make life feel warm.

3. LOOK WITHIN Spark

Photograph something that matches how you feel today:

A cozy blanket, a favorite ornament, a peaceful corner, a silly object that shows your mood.

This helps kids name their feelings in an easy, creative way.

WHY IT MATTERS

The Spark Scan Challenge teaches kids to slow down, look closer, and rediscover wonder. It builds curiosity, emotional awareness, and meaningful family connection—without adding stress or screens.
