Measure Key Vitals Immediately with Advanced Facial Scanning.

In under a minute, a simple selfie video you take with your phone becomes a powerful health check. The Vital 110 Facial Scan analyzes your video to measure 22 key indicators—like heart rate, blood pressure, and stress level—giving you real-time insights.

Since signing up for Vital 110, I've never felt more supported. The telemedicine visits fit my schedule, and knowing I don't have to worry about the cost makes a big difference. The \$0 prescriptions and lab work have been such a relief.
