

MNG Product Structure Plan

SOIL · FOLIAR · SEED | High-Efficiency Farming System · 2026 Portfolio Architecture

ONE SYSTEM

Soil restores capacity · Foliar delivers performance · Seed starts strong

SOIL

FOLIAR

SEED

RESULT

SOIL APPLICATION

Rebuild the foundation

01

- AquaSave**
Natural soil conditioner · water retention & irrigation efficiency
- PRILL CaS**
Calcium + sulfur · alkaline soil balance & crop quality
- PRILL CaMgS**
Calcium + magnesium + sulfur · soil structure & fertility
- PRILL CaPS**
Calcium + phosphorus + sulfur · soil improver for P dynamics
- BioRock-P**
Controlled-release phosphorus reserve · low-fixation root-zone supply
- PhosActiv**
Phosphorus-use efficiency enhancer · unlocks fixed and applied P

SYSTEM ROLE

Foundation: soil structure, Ca/Mg/S balance, phosphorus efficiency and water-holding capacity.

FOLIAR APPLICATION

Direct plant performance

02

- Classic Plus**
Plant strengthening formula · nutrient transport & resilience
- Mg12**
Magnesium-rich foliar solution · photosynthesis & enzyme activation
- Boron**
Targeted boron solution · flowering, fruit set & quality
- Fe20**
Iron-rich solution · chlorophyll, foliage & stress resistance
- CaPS Foliar**
Calcium · phosphorus · sulfur for high-demand crops
- AminoTreat Foliar**
Amino acids · stress-cycle recovery & nutrient uptake

SYSTEM ROLE

Performance: targeted leaf nutrition, micronutrient correction and stress-cycle support.

SEED & STARTER

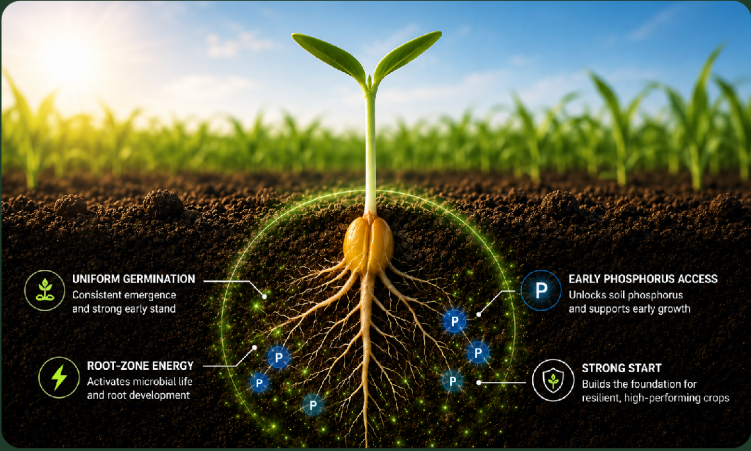

Start strong from day one

03

- AminoTreat Seed Treatment**
Natural seed coating · germination, early growth & seedling resilience
- MNG Start 5-20-1**
Micro-granule starter · localised phosphorus placement at drilling

SEED LOGIC

Start: uniform germination, root-zone energy and early phosphorus access.

MNG APPLICATION ARCHITECTURE

Soil foundation → Foliar correction & performance → Seed & starter establishment

Reduce inputs · Restore soil · Save water · Increase profit
