

PROTECT THE POTENTIAL YOU ALREADY PAID FOR.

After you invest in seed, fertiliser, water, machinery and labour, don't leave crop performance to chance.

MNG Foliar delivers targeted foliar nutrition when crop demand is highest – vegetative growth, flowering, grain set and stress. It does not replace your base fertiliser programme; it helps the plant perform when it matters most.

01 FAST UPTAKE

Micronised to ~3 µm for rapid absorption and high reactive surface area.

02 CRITICAL TIMING

Applied at the key BBCH stages when crop demand peaks.

03 STRESS SUPPORT

Supports the crop through heat, drought and nutrient imbalance.

THE MNG FOLIAR LINE

Classic Plus

EVERYDAY CROP SUPPORT

Balanced nutrition for vegetative growth and general crop performance.

Mg12

MAGNESIUM & CHLOROPHYLL

Supports chlorophyll formation and photosynthetic activity.

Boron

REPRODUCTIVE SUPPORT

Targeted boron around flowering, pollination and grain set.

Fe20

IRON SUPPORT

For crops showing iron limitation or chlorosis.

AminoTreat

STRESS-CYCLE SUPPORT

Amino-acid support during heat, drought and transplant shock.

Foliar CaPS

QUALITY & FINISHING

Calcium and phosphorus for quality formation and crop finish.

ENGINEERED FOR Foliar performance

~3 µm micronisation

Crop-stage-specific timing

High reactive surface area

Designed for rapid response

Targeted foliar delivery

Bypasses some soil limitations

FIELD-VALIDATED TRIAL HIGHLIGHTS

+31.8%

WHEAT – CHINA

+43.4%

CORN – PHILIPPINES

+31%

TOMATO – NETHERLANDS

+37.7%

POTATO – KUWAIT

*Results from individual MNG field trials. Performance depends on crop, soil, climate, management, application timing and programme design. Results are not guaranteed.

**YOU ALREADY INVESTED IN THE HECTARE.
HELP THE PLANT TURN THAT INVESTMENT INTO PERFORMANCE.**

Ask your local MNG distributor for a crop-stage foliar programme.
