- Appreciated the use of zoom time
- Excellent professor no comments.
thank you, Dr. RAD
- Great professor, explains topics in a detailed fashion just hard to follow sometimes as he tends to speed through topics.
- NONE
- Overall it was an interesting course. I got the opportunity to learn JMP which I feel is a great tool for quick analysis. Professor has always answered all my queries very patiently.
- Overall one of the most kind and genuine teachers i have had at sac state and I look forward to taking another class of his next semester
- Professor Adrian delivered the course clearly and has been helpful with all the questions I have.
- Professor Aryarad is a great teacher. He cares about his students and wants everyone to succeed.
- Professor Aryarad is very kind and helpful. He is understanding and provides a lot of opportunities for a good grade.
- Professor,
Try and make your lectures a little more lively and fun. You can try doing activity worksheets to help with the learning. You can give out participation points to help with involvement.
Thank you.
- The instructor makes the course more convenient for students to learn.

2. Optional Written Comments

2.1) What did you like about the course?

- Course content was simple enough to figure out on your own with little guidance. JMP is a great tool to learn. I liked that Professor offers videos through Youtube with additional videos for help on reviews for Exams and step by step of how to perform specific analysis through JMP. I also like that professor gives two attempts on the exams and then averages them for grade. It's a great opportunity to learn what you need to work on before retaking.
- Homework was relevant to exams.
- I enjoyed learning the JMP system! Through this class, I am now able to gather valuable information from collected data.
- I like that the homework actually relates to what we learn in the textbook, and that the professor teaches using the textbook powerpoints because you know what to expect on the homework assignments. I like that the professor gives us enough time to do the homework and to study for the exam.
- I like this course because I learned how to use the JMP from this course. I start using the JMP in another course to solve problems.
- I liked how understanding the professor is and how he helped us understand the course. He was also super fair and knowledgeable.
- I liked how we were allowed to go at our own pace on the assignments and how we were given 2 attempts each exam.
- I liked that the course was flexible. We had lectures on Tuesday and a video on Thursday, which helped me when I had to do other work for other classes.
- I liked using MyMathLab to do my homework and how it gives you multiple chances to get the question right. I like the grading and the 2 chances to take the tests. I liked all the videos that were provided.
- It is online and materials are available anytime
- Knowledgeable and have full command of the study material.
- Learning JMP is an important skill that I take from this course
- Prof. Aryarad made this class very enjoyable.
- The additional videos were very helpful as a resource. Professor definitely knows the material very well.
- The grading and my assignment system. For example, my lab makes it easier to learn by giving us examples to work through.
- The videos including to assist learning.
- This professor has done a great job at simplifying a complex course like DS101. His pre-recorded videos with instructions on JMP, exam prep videos detailing how to find solutions to complex problems, and his willingness to review material during every class period have been truly helpful. Also, he allows students 2 attempts on the exam and a short grace period of time between the attempts. Additionally, I appreciate that there are unlimited attempts available on the homework, and the due dates are the last week of class. I've had a great experience with this professor. He's thoughtful, considerate, helpful, and is conscientious that his students are still dealing with the ramifications of the pandemic.
- This professor has the record for every class and he can drop the lowest score.
