GERALD “GEE” CORDER

NetSuite Solution Architect · ERP Transformation Leader · Principal Financial Consultant

Henderson, NV 89052 • 702-496-0328 • gee@ppclv.consulting • ppclv.consulting • linkedin.com/in/geecorder

EXECUTIVE SUMMARY

Senior NetSuite Solution Architect and ERP transformation leader with 30+ years driving large-scale ERP implementations, SAP-to-NetSuite migrations, and complex multi-system integration ecosystems across manufacturing and distribution. Trusted at the C-suite for UAT governance, PMO command-center execution, and cutover strategy on high-risk, deadline-driven programs. Blends solution-architecture discipline with principal-level financial consulting and hands-on NetSuite administration across the full order-to-cash and procure-to-pay lifecycle.

CORE COMPETENCIES

- ERP Transformation & Cutover
- SAP -> NetSuite Migration
- UAT Strategy & Governance
- PMO Command-Center Reporting
- Data Migration & Validation
- Integration Architecture
- Principal Financial Consulting
- Manufacturing Cost & Costing
- Forensic Accounting Review
- SuiteScript 2.x / SuiteQL
- REST APIs & Custom GL Plugins
- Order-to-Cash / Procure-to-Pay
- Solution Architecture
- Risk & Release Management
- Six Sigma · Agile · Waterfall

SELECTED ACHIEVEMENTS

- Led an enterprise SAP-to-NetSuite transformation (Tessco “Project Ignite”) to a fixed go-live, owning architecture, governance, and cutover across all functional and technical workstreams.
- Currently advising Southwest Power Pool’s IT leadership through a GP-to-NetSuite migration delivered by a Big Four SI, and leading NetSuite fixed-asset remediation and a stub-year fiscal-year change for Nashville Soccer Club (both via Inspyr Solutions).
- Architected a SAP-to-NetSuite data-validation framework spanning GL, AR/AP, inventory, orders, and master data — delivering reconciled balances and an auditable cutover.
- Converted three automotive-aftermarket divisions from QuickBooks to a single NetSuite OneWorld environment, integrating third-party CPQ and a full e-commerce distribution model.
- Directed integration validation across 8+ platforms — SPS Commerce (EDI), RF-SMART (WMS), FreightPOP, Vertex, CyberSource, TCOM, TAPP — and designed remediation for FreightPOP shipping and rate-shopping gaps.
- Delivered NetSuite implementations and post-go-live support for two Silicon Valley equity-investment firms, aligning multi-entity GL and consolidated reporting to fund accounting.

PROFESSIONAL EXPERIENCE

Southwest Power Pool (SPP) — Microsoft Dynamics GP -> NetSuite Migration (via Inspyr Solutions)

Sep 2026 – Present

Client-Side NetSuite Migration Lead / Advisor

- Client-side program oversight: Represent the client’s IT Corporate Applications group on a GP-to-NetSuite migration delivered by a Big Four systems integrator — sprint-based build with WRICEF tracking from Design through Build, SIT, UAT, and cutover toward an early-2027 go-live.
- Executive reporting: Author the weekly migration recap for IT leadership — quick wins, items still moving, and decisions needed, tied to watch items and near-term dates — built from the SI status deck, sprint WRICEF trackers, and consultation write-ups.
- Decision support: Translate SI design and build status into the finance and operational consequences leadership needs to decide on, with supporting workbooks ready for the directors.

Nashville Soccer Club — NetSuite Finance Remediation & Fiscal-Year Change (via Inspyr Solutions)

Sep 2026 – Present

NetSuite Finance Lead

- Fixed-asset reconciliation: Led a three-way, multi-entity reconciliation of GL, the NetSuite Fixed Asset (FAM) subledger,

and third-party GAAP rollforwards — isolating the subledger as the break, tying a long-standing open item to specific never-capitalized assets, and delivering a corrective action plan, correction log, production execution runbook, and audit / executive roadmap.

- Fiscal-year change: Designed and validated a calendar-to-May-31 fiscal-year change with a five-month stub year in sandbox — period-calendar rebuild, adjustment period, posting-boundary tests, and comparative / budget-vs-actual reporting definitions — before any production change.
- Governed execution: Posted and verified depreciation catch-up entries and subledger clean-ups in sandbox with zero unplanned GL impact; built a read-only NetSuite AI-analysis role and SuiteQL retrieval guide for the client's administrator.

Tessco Technologies — Project Ignite (SAP -> NetSuite Transformation) Jan 2026 – Aug 2026

Program Lead / Solution Architect / PMO Lead

- Enterprise transformation: Led the SAP-to-NetSuite program to a fixed go-live, owning architecture, governance, and cutover across functional and technical workstreams.
- UAT governance: Designed an end-to-end, priority-based UAT3 execution framework with executive visibility into blockers, dependencies, and remediation.
- PMO command center: Built executive dashboards (Late / This Week / Dependencies) and cutover-readiness KPIs with integrated risk tracking for C-suite and sponsor reporting.
- Integration ecosystem: Directed validation across SPS Commerce (EDI), RF-SMART (WMS), FreightPOP, Vertex, CyberSource, TCOM, and TAPP; designed FreightPOP remediation.

Ceramo — NetSuite <-> Zoho One Integration Oct 2025 – Present

Integration Architect

- Designed a NetSuite -> Zoho One integration using REST APIs, Zoho Data Prep, and a SuiteQL extraction framework, with technical documentation for long-term maintainability.

Accelsius — NetSuite Implementation & Integration Strategy Sep 2024 – Sep 2025

Principal Financial Consultant / Manufacturing Cost Consultant

- Full implementation: Led NetSuite deployment for an advanced-technology manufacturing environment from discovery through go-live.
- Financial architecture: Owned chart-of-accounts, GL structure, and reporting framework aligned to manufacturing accounting.
- Manufacturing cost: Designed standard-cost, work-order, and inventory-valuation logic with variance-reporting methodology.

Champion — NetSuite Optimization & Process Transformation Jun 2024 – May 2025

Forensic Accounting Consultant

- Forensic review of NetSuite GL and transactional data to resolve discrepancies, reconciliation gaps, and revenue/expense misclassifications post-go-live.
- Re-engineered Order-to-Cash and fulfillment processes; enhanced pricing, discounting, and workflow automation to close control gaps.

Jindilli — NetSuite Administration & System Ownership Oct 2023 – Present

NetSuite Administrator

- Full NetSuite platform ownership — security model, custom fields/forms/workflows, saved searches, and end-to-end O2C / P2P / R2R support; ongoing data governance, CSV imports, integration monitoring, and user support.

PaineSchwartz Partners — Infor SunSystems -> NetSuite Conversion (San Mateo, CA) Apr 2022 – Apr 2024

Senior Principal Consultant / Project Manager

- Platform conversion: Led full SunSystems-to-NetSuite conversion for an equity-investment firm, owning plan, governance, and go-live.
- Financial architecture: Designed multi-entity GL and consolidated reporting aligned to fund accounting and portfolio-company roll-ups.
- Auditable cutover: Architected migration across GL, AR/AP, vendors, and history with reconciliation and validation

controls.

State Garden — NetSuite Implementation (Food Manufacturing)

Nov 2021 – Mar 2024

Principal Financial Consultant / Supply Chain Enablement

- Owned the financial workstream (GL/AR/AP, management reporting) and supply-chain enablement — demand/supply planning, inventory, procurement, and production.
- Addressed lot-traceability and regulatory compliance specific to food manufacturing; delivered planning dashboards and data-migration validation.

Priceless Plus Corporation — NetSuite Practice

2011 – Present

NetSuite Implementation Consultant / Principal

- Automotive aftermarket: OneWorld conversions for three divisions (two custom-manufacturing with CPQ, one 100% e-commerce distribution) from QuickBooks.
- Ecosystem integration: CyberSource, Avalara, Celigo, WooCommerce, TrueCommerce, RF-SMART, Endicia, UPS/FedEx, and more into automated end-to-end flows.
- Also delivered NetSuite for two Silicon Valley equity-investment firms and multiple food-&-beverage / SuiteSuccess stability engagements.

EARLIER CAREER — ERP LEADERSHIP

Three decades of ERP leadership (1990–2011) across BPCS V3.0–LX 8.4, MAPICS XA, Oracle JDE, Microsoft Navision, and PRMS — as principal financial and supply-chain consultant, AS/400 release manager, and engagement lead across food & beverage, medical, aircraft, automotive, ceramic tile, high-pressure pipelines, oil & gas, and lighting. Roles included Director IT / PM at Dole Food Company, Engagement Manager at Software Alliance and Nexgen Software, and Finance/Business-Analysis Manager at Packard Bell (NEC).

TECHNICAL FOOTPRINT

ERP Platforms:	Oracle NetSuite • SAP • Oracle JDE/World • Infor BPCS LX 8.4 • Infor SunSystems • MAPICS XA • PRMS • Microsoft Navision • Zoho One
NetSuite Toolset:	SuiteScript 2.x • SuiteQL • Saved Searches • Custom GL Plugins • REST APIs • Workflow Automation
Integration:	SPS Commerce (EDI) • RF-SMART (WMS) • FreightPOP • Vertex • CyberSource • Avalara • Celigo • WooCommerce • TCOM • TAPP
Methodologies:	Agile • Waterfall • Six Sigma • SOX • GCC • SDLC • ITIL

EDUCATION & CERTIFICATIONS

B.S., Project Management — Capella University, Minneapolis, MN

A.A., Economics — Los Angeles Valley College, CA

ITIL Certified — Certification
