CLINICAL ECHOCARDIOGRAPHY IN DOGS AND CATS

Serena Crosara, Sonja Fonfara

Echocardiography is a powerful diagnostic tool that offers critical insights into cardiac structure, function, and blood flow. Used by specialists and general practitioners, echocardiography is essential for diagnosing and managing heart disease in dogs and cats. This book offers a deep, clinically focused dive into veterinary echocardiography. Authored by a team of leading experts, it covers core principles, functional assessment, and specific diseases bringing together the latest techniques. With over 200 figures and more than 100 videos, this book turns complex concepts into a visual and practical learning experience.

POINT-OF-CARE ULTRASOUND IN DOGS AND CATS

Use of Ultrasound in Anesthesia, Emergency and Intensive Care

Roberto Rabozzi, Stefano Oricco

The volume is characterized by a practical approach to clinical syndromes thanks to diagnostic and therapeutic algorithms based on the patient's problem (dyspnoea, shock, congestion) and not on the pathology of the single organ. The rich iconography of the volume is completed by 75 videos accessible with QR-Codes, showing the techniques for acquiring ultrasound images and the relative movements of the probe.

FLUID THERAPY IN DOGS AND CATS

Second edition

Fabio Viganò DVM, Deborah Silverstein DVM, DACVECC

Fluid therapy is among the most widely used and necessary therapies for critically ill patients and for those who are not able to hydrate and feed themselves spontaneously. This handbook summarises the fundamentals for understanding the hydroelectrolytic needs a critical patient may have, the types of fluids that can be administered, and the consequences that a decision may entail. Every chapter ends with useful clinical cases.

MAIN ENDOCRINE DISORDERS OF THE ADRENAL AND THYROID AXES IN DOGS AND CATS

Servet Update

Victor Castillo

This book describes, from a practical and clinical point of view, the most relevant disorders affecting the adrenal and thyroid axes in cats and dogs. It is intended to help veterinary surgeons in the diagnosis of both common disorders of the endocrine system, such as Cushing's syndrome and hypothyroidism, and less frequent pathologies, such as adrenal insufficiency and hyperthyroidism.

LOW-STRESS HANDLING IN THE VETERINARY CLINIC

Rosana Álvarez, Germán Quintana

This book is intended as a practical guide to improve various aspects of the everyday practice: how the veterinary surgeons understand and relate to patients and clients, the handling of animals during different procedures, and the implementation of programmes to deal with behavioural issues. These aspects will have a highly positive impact on the wellbeing of the patient, the client, and the staff.

BEHAVIOURAL CHANGES ASSOCIATED WITH PAIN IN COMPANION ANIMALS

Tomàs Camps Morey, Marta Amat Grau

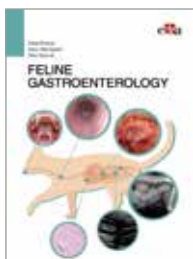

This book deals with pain in companion animals and how it affects their welfare, health and, of course, behaviour. It describes the difficulties encountered to finally reach the conclusion that animals and humans share the same neurophysiological mechanisms to feel pain. It then goes deeper into the changes that pain can cause in the behaviour of dogs and cats and the tools available to the veterinary surgeon to control it.

FELINE GASTROENTEROLOGY

Fabio Procoli, Karin Allespach, Silke Salavati

This book focuses on “a medic’s perspective” on feline alimentary tract health, which starts with considering differential diagnoses in a structured way based on the most common clinical signs. It also includes the invaluable input from other specialties we so often draw on in clinical practice, namely laboratory diagnostics, diagnostic imaging, clinical pathology and histopathology, and nutrition, which can be a particular challenge in cats. It also covers feline-specific infectious and neoplastic diseases

CANINE GASTROENTEROLOGY

Veterinary Internal Medicine Series

Edward Hall

The book, divided into six sections starts with the diagnostic approach to specific clinical presentations that may or may not be due to GI disease. Each chapter includes an algorithmic pathway. A section on diagnostic methods is followed by sections about the management of GI diseases and non-specific and specific drug treatments. The fifth section covers diffuse inflammatory, infectious and neoplastic diseases of the GI tract. Specific diseases of each area of the tract from oesophagus to large intestine are found in the final section.

DIAGNOSTIC AND THERAPEUTIC ALGORITHMS IN INTERNAL MEDICINE FOR DOGS AND CATS

Federico Fracassi

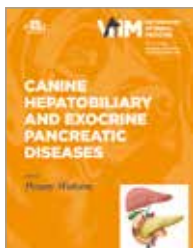

The problem-oriented approach is recommended by the College of Internal Medicine to address and resolve medical problems. Hence the idea of a book based on algorithms that guide the reader step-by-step with logical, practical, cost-effective options to proceed from a general concern, laboratory abnormality, or imaging finding to a specific diagnosis or treatment. Moreover, comprehensive notes, linked to the algorithms by references, give more details regarding a specific diagnostic investigation, a particular disease or the therapy recommended.

CANINE HEPATOBILIARY AND EXOCRINE PANCREATIC DISEASES

Veterinary Internal Medicine Series

Penny Watson

Causes and treatments of the diseases of the liver and pancreas are still nowadays poorly understood. There are very few clinical signs that are pathognomonic for liver or pancreas diseases, and the clinician must consider differential diagnoses for presenting signs. The first section of the book, thanks to problem-orientated algorithms, guides practitioners through clinical assessments and workups, the subsequent sections meticulously delve into pancreatic and liver diseases. The book is loaded with informative algorithms, tables, figures, and videos.

STRESS, COMPASSION FATIGUE AND BURNOUT HANDLING IN VETERINARY PRACTICE

Inmaculada Pérez, Patricia Smith

There is a need to publicize the syndromes occurring in veterinary personnel due to work-related stress. Vets are apathetic or leaving the profession. It is vital for their emotional health that they know about these syndromes and the importance of seeking help early on. The up-to-date compilation of studies gives a clinical and human vision of these challenges based on the authors' experience.

CLINICAL REASONING AND DIFFERENTIAL DIAGNOSIS

Evaluate your Skills

Josep Pastor

After explaining how clinical reasoning can be applied to identify a patient's problems, focus on the most relevant issue, and determine its causes, this book describes complex case studies from a physiological and diagnostic perspective. Readers will be asked to answer a series of questions in order to assess their knowledge and acquire the necessary skills for properly establishing a diagnosis.

CANINE NEUROLOGY

Veterinary Internal Medicine Series

Luisa De Risio, Gualtiero Gandini

Dogs can experience a range of challenges with their nervous system including pain, problems with coordination, limb weakness, and seizures, to name a few. The first section of the book, thanks to problem-orientated algorithms, guides practitioners through clinical assessments and workups, the subsequent sections meticulously delve into neurologic diseases. The approach to the neurological patient is particularly complex, which is why the authors have dedicated an entire section to basics of clinical neurology. The book is loaded with informative algorithms, tables, figures, and videos.

CANINE AND FELINE NUTRITION AND DIETETICS

A guide for the general practitioner

Debora Guidi

The goal of this book is that each veterinarian can clearly answer the questions that are most frequently asked by the owners: Which type of food to choose? How to navigate between the different products on the market? The text also provides real recipes to be proposed in synergy with the nutritional handbooks of various food manufacturers, to consciously choose and be able to compare the nutritional characteristics of different products on the market. The book also gives great importance to aspects related to behavior and alimentary disturbances on an emotional basis.

ATLAS OF PARASITOLOGICAL DIAGNOSIS IN DOGS AND CATS. ECTOPARASITES

Guadalupe Miró, Patrick Bourdeau

An up-to-date descriptive atlas on the diagnosis of the main types of ectoparasitosis in dogs and cats. It covers the most relevant aspects of each parasite, using graphical resources to help identify these pathogens and decide on the actions to take in each case. The work is complemented with QR links to videos of collecting and processing samples and the visualization of some of these parasites under the microscope.

EPIDEMIOLOGY IN SMALL ANIMAL PARASITOLOGY

Climate Change and Social, Economic and Political Factors

Peter Holdsworth, Maggie Fisher

This book provides an understanding of climate change and other contributing factors in the emergence/reemergence of parasitic diseases in companion animals. It describes the known changes in the epidemiology of key parasite infections and highlights zoonotic threats, and is therefore a valuable resource for veterinary practitioners to manage risks and keep abreast of emerging/reemerging parasitic diseases of pets.

LIFE CYCLES OF ECTOPARASITES IN SMALL ANIMALS

Dunbar Gram, Heather S. Walden, Jeanmarie Short

Small handbook gathering all the life cycles of the most common ectoparasites in dogs and cats. Similar parasites are grouped together based on their life cycle and, consequently, their sensitivity to parasiticides. The aim is to provide readers with key aspects of parasite control and prevention, highlighting those diseases that can be transmitted by them. Geographic distribution maps are also included.

PARASITES

Pet Owner Educational Atlas

Servet editorial. Reviewers: Doug Carithers, Guadalupe Miró

This illustrated work aims at assisting veterinary surgeons in their communication with pet owners. In this atlas, the drawings about internal and external parasites of dogs and cats will help veterinary surgeons when giving explanations about parasites to their clients, as well as about the control, prevention and treatment plans that may need to be set up.

SURGERY

Pet Owner Educational Atlas

Servet editorial. Reviewer: José Rodríguez

This notebook includes drawings of the anatomical structures, most frequent ailments and some of the most commonly used surgical techniques in dogs and cats. Its purpose is to facilitate communication between vets and their clients, since it will enable them to explain graphically what is happening to the pet, where, and the procedure for the possible resolution of the problem.

NEW

DENTISTRY AND ORAL SURGERY

Pet Owner Educational Atlas

Aurora Mateo Román

This volume covers the most frequent oral and dental pathologies seen in small animal practice. Pets with dental pathologies usually do not lose their appetite and owners often do not detect if their pet is suffering from oral discomfort or pain. This book explains the importance of early diagnosis to owners, as well as details of their pet's condition, its possible consequences, and the different treatment options available. The sheets in this atlas offer simple but accurate and rigorous information, becoming an essential tool for communication with owners for the benefit of everyone involved.

DISEASES OF SENIOR CATS AND DOGS, 2nd ED. Diagnosis and Therapy

Salvador Cervantes Sala

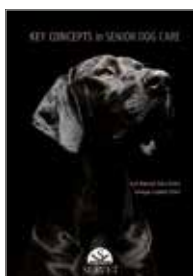

Pets are living longer than ever before. Almost half of their lifespan makes up the senior/geriatric life stage. This book is a practical manual that comprehensively covers geriatric medicine of dogs and cats, and provides readers with a different approach to clinically useful information on this topic. In this second edition all chapters have been rigorously reviewed and updated, with a particular emphasis on pharmacological protocols and dosages and new therapies. An entire new chapter on endocrine problems has been added.

COLOSTRUM FEEDING IN PIGLETS

Essential Guides on Swine Health and Production

Luis Sanjoaquin, Walter Hurley

Because the prolificacy of sows can now be very high, piglets require special attention to ensure their survival. This book describes the importance of colostrum and its immediate ingestion after farrowing. The energy, immunity, and growth factors contained within make colostrum feeding essential for the optimal development of newborn piglets.

PORCINE CIRCOVIRUS TYPE 2: THE VIRUS, THE DISEASE AND THE VACCINE

Joaquim Segalés

This book, focused on the most remarkable facts linked to porcine circovirus type 2 (PCV2) and related diseases, places special emphasis on aspects connected with immunity, diagnosis and proper use of vaccines, which have brought about a revolution in the subclinical control of PCV2 since mid/late 2000s due to their great efficacy.

SWINE DISORDERS GUIDE

John Carr

This guide is a collection of key data and practical recommendations that turns it into a reference handbook for pig farmers, technicians and workers on swine operations. A number of tables and diagrams summarise the standard parameters relating to production, pig flows and the main clinical signs of swine diseases. The control lists included may be used as a starting point for the identification of disease outbreaks in breeding farms.

**HOW TO HANDLE AN AFRICAN
 SWINE FEVER CRISIS**

Vet Topics

Pablo Catalá Gregori, José Ignacio Barragán Cos

This book describes the key features of ASF including the characteristics of its causative agent (ASF virus), its various routes of transmission, and the broad spectrum of clinical presentations. This book discusses currently available tools for field detection and laboratory diagnosis of ASF, the importance of early detection, and recommended preventive and control measures.

LACTOGENIC IMMUNITY IN THE SOW: A PRACTICAL APPROACH

Lorenzo Fraile

Good transfer of passive immunity from sows to piglets is crucial to ensure piglet survival on pig farms. This book is intended to help veterinary practitioners work towards this goal, and includes a review of the basics of immunology and vaccination, as well as comprehensive chapters on the immunisation programmes used in sows and on the transfer of passive immunity from sows to piglets.

THE OESTROUS CYCLE OF THE COW

Updated Edition

Manuel Fernández

This book helps the reader to interpret the reproductive status of the cow using an outstanding selection of photographs with an eminently practical focus. The carefully chosen images let the reader visualise what they are touching during an examination, and describe the more basic procedures, such as rectal palpation or artificial insemination. It also highlights the importance of using oestrus synchronisation protocols in routine reproductive practice.

VET TOPICS. NEONATAL DIARRHOEA IN CALVES

Pablo Díaz, José Pedreira, Patrocinio Morondo et al.

Neonatal calf diarrhoea is one of the most frequent problems on cattle farms, and can have a disastrous impact on farm profitability. The multifactorial nature of diarrhoea complicates its diagnosis and the selection of the control measures. This book uses a simple and practical approach to address the key aspects of the disease, providing professionals with a range of tools to facilitate its management.

THE PERIPARTUM COW: PRACTICAL NOTES

Manuel Fernández, Manuel Liz, Matilde Hernández

The cow's peripartum period from a practical point of view, explained through theoretical explanations and a huge collection of clinical cases. Normally, disorders or conditions occurring in the peripartum period are not independent events; they are the result of the interaction of several events occurring over time. The authors highlight here the importance of assessing bovine pathologies as a whole.

IN OVO TECHNIQUES AND TREATMENTS IN POULTRY EGGS

Mahmoud Alagawany, Mayada Ragab Farag

This book provides a comprehensive review of in ovo techniques in poultry eggs, which are aimed at improving embryonic development and decreasing economic losses in poultry farms. It's divided into five chapters, which address the basics and sites of in ovo injection, nutrient utilisation for the development of the chick embryo, the role of early in ovo feeding for the chick embryo, and applications of in ovo technology for various nutrients and biological supplements in poultry.

VACCINATION IN POULTRY

**Francisco Javier Torrubia, Sonia Téllez,
 Cristina Gómez et al.**

Vaccination is one of the cornerstones of poultry production. In fact, it is one of the aspects that most influence production parameters in the poultry industry. In broilers, the optimum time of vaccination should aim at obtaining the maximum meat yield. In layers and breeders, both time and the route of administration have an influence in the quality of egg shells and the number of eggs per laying, among others.

HEALTH MANAGEMENT IN TILAPIA PRODUCTION

Carlos Arturo Iregui Castro, Alba Lucía Rey Castaño, Ignacio de Blas Giral et al.

This useful guide serves to better diagnose and prevent the most common diseases affecting these fish. It covers infectious and parasitic diseases as well as the conditions caused by poor water quality. A chapter on biosecurity provides essential guidelines for both the prevention of diseases and their early detection. The high-quality pictures will help the reader gain basic knowledge of health management in tilapia.
