

The Enterprise Operating System

NEXUS ERP for Distribution

One platform for inventory, sales, and supply chain agility.

NEXUS unifies sales, operations, finance, supply chain, workforce, and point of sale in a single workspace, replacing the separate logins and per-seat penalties of a multi-vendor distribution stack.

Core Distribution Capabilities

- Warehouse stock radar and multi-warehouse visibility
- Lot and batch tracking with barcode scanning
- Landed-cost accounting
- Procurement command monitor
- Dynamic bills of materials and MRP for light manufacturing

One Login, One Bill

Every plan starts with a 14-day unlimited free trial — no credit card, no sales calls, no implementation fees. Import your legacy data, customers, and inventory in a simple one-time setup instead of a consulting engagement priced against the software.

Plans

- Starter (\$149/mo): core inventory, dispatch, and quote-to-invoice
- Professional (\$399/mo): adds advanced shipping, multi-warehouse, and landed cost
- Enterprise (\$899/mo): adds manufacturing, MRP, and multi-currency consolidation

ABOUT NEXUS END2END

The unified operating system for the modern enterprise — identity, security, operations, and front-desk experience. One platform, one audit trail, one bill. Visit nexusend2end.com
