

NEXUS

END2END

The Enterprise Operating System

NEXUS ERP — One Platform. Every Operation.

Instant activation. No consultants. No per-seat penalties.

NEXUS unifies sales, operations, finance, supply chain, workforce, and point of sale in a single intelligent workspace — built to seamlessly replace NetSuite, SAP Business One, Microsoft Dynamics 365, and QuickBooks Enterprise.

One login. One database. One monthly invoice. Every plan starts with a 14-day unlimited free trial — no credit card, no sales calls, no implementation fees.

The Nexus Advantage

- One login into every operational capability.
- One database — no sync jobs, no drift.
- One flat monthly invoice that doesn't move with headcount.
- Native AI and point of sale included, not sold as add-ons.
- \$0 implementation tax, with self-serve setup in under 5 minutes.
- Instant activation — upload your data and go live today.

36 Industry Verticals

From general business to field services, manufacturing, and senior living operations, the platform adapts its vocabulary and chart of accounts to your sector out of the box.

The Legacy ERP Trap

NetSuite, SAP, and Dynamics 365 each bill you separately for a fragment of the same business — multiple logins, per-seat penalties, fragmented data silos, and expensive consulting fees for every change request.

Chameleon Onboarding

The Chameleon Engine adapts vocabulary and chart of accounts to your sector, then our team finishes the job by hand — white-glove setup that doesn't end when the wizard closes. The built-in Data Integration Workspace migrates data from QuickBooks, Excel, or NetSuite in minutes.

NEXUS Is Right For You If:

- Your company needs an ERP but finds the options complex and costly.
- You need one solution to support your processes end-to-end, without stitching together point tools.
- You're tired of “Request a Demo” gatekeeping and commission-driven sales calls.
- You want to add users and locations without a headcount tax on your bill.
- You want to try the full platform before you commit — no credit card required.

Moving dispatch, ticketing, quoting, and accounting onto one workspace ended a weekly ritual of cross-checking systems for Five Points IT. In their words: “we stopped reconciling three systems against each other every Friday.”

— Operations Leadership, Five Points IT

› CUSTOMER STORIES

One Login, Every Suite

A single gateway into your entire stack. Launch straight into ERP, or unlock Nexus POS, Nexus Shield, and Nexus VMS as your operation grows — every workspace shares the same identity, data core, and audit trail.

Enterprise-Grade Architecture

- ASC 606 / IFRS 15 revenue recognition engine.
- Multi-entity intercompany consolidations and FX revaluation.
- Workspace-level row security and an encrypted credentials vault.
- Enterprise SSO and OIDC via the Command Center.

The Chameleon Guarantee

Import your legacy data, customers, and inventory in a simple one-time setup — no predatory integration fees. Custom workflows, tailored reporting, and UI tweaks are included at no additional cost, so the platform evolves with you instead of generating a stream of consulting bills.

Compliance & Trust

SOC 2 Type II (in progress), HIPAA, PCI-DSS, and GDPR — built for organizations that need governance as much as functionality.

Three Ways to Activate

Every tier starts with a 14-day unlimited free trial. No credit card, no sales calls, no implementation fees.

Starter \$149/mo CRM, quote-to-invoice, dispatch, and inventory for teams up to 10.	Professional \$399/mo Adds AI outbound, fleet management, HR & payroll, and standard financials, for teams up to 100.	Enterprise \$899/mo Adds manufacturing, revenue recognition, multi-currency, and dedicated workspace isolation, for teams up to 100.
---	---	--

The unified operating system for the modern enterprise — identity, security, operations, and front-desk experience. One platform, one audit trail, one bill.

ABOUT NEXUS END2END
