

NEXUS Multi-Entity Finance

Multi-entity intercompany consolidations and FX revaluation, built in.

Multi-entity consolidations roll each business unit into group statements automatically, with ASC 606 / IFRS 15 revenue recognition and FX revaluation running on the same ledger.

Key Capabilities

- Multi-entity intercompany consolidations
- Multi-currency FX revaluation
- ASC 606 / IFRS 15 revenue recognition engine
- 8-tier bank reconciliation and period locking

Consolidation Without the Workbook

Because every entity shares the same data core, group-level statements are a report you open, not a workbook you rebuild every close.

Where It Fits

- Multi-entity consolidation and revenue recognition included from Enterprise

Consolidation used to be a workbook and a week. It is now a report we open whenever we want the number.
