

NEXUS Inventory & Warehouse Management

Lot and batch tracking, barcode scanning, and landed-cost accounting across every warehouse.

Warehouse stock radar and fulfillment velocity views keep inventory levels visible across every location, so shortages and overstock get caught before they become a problem.

Key Capabilities

- Lot and batch tracking
- Barcode scanning for receiving and picking
- Landed-cost accounting across warehouses
- Multi-warehouse stock radar
- Fulfillment velocity monitoring

Connected to Finance and Sales

Inventory sits on the same data core as sales orders and financials, so stock movements post in real time without a separate sync job between systems.

Where It Fits

- Basic inventory and item master included from Starter
- Advanced multi-warehouse and landed cost included from Professional

ABOUT NEXUS END2END

The unified operating system for the modern enterprise — identity, security, operations, and front-desk experience. One platform, one audit trail, one bill. Visit nexusend2end.com
