AGRICULTURAL

— WHO WE ARE

Easy Flow Filters is an Australian supplier of filtration solutions for mining, industrial, automotive and heavy-duty applications. We source OEM-equivalent filters built to recognised international standards and match them directly to your equipment — so you get the right part, the right specification and a price that protects your margin. Whether you run a single machine or a mixed fleet, we make filter supply simple: tell us the part number or the equipment, and we handle the rest.

— WHAT WE SUPPLY

Air Filters

Primary and safety elements for high-dust mining environments.

Oil Filters

Full-flow and bypass, engine and transmission.

Fuel Filters

Primary and secondary, water-separating.

Hydraulic Filters

Return-line, pressure and suction elements.

Cabin / A-C Filters

Operator comfort and equipment protection.

Scheduled Supply

Stock planned to your maintenance intervals.

WHY EASY FLOW FILTERS

01 Part-Number Cross-Reference

Send your OEM numbers; we match equivalents and confirm specs before you order.

02 Fleet Pricing

Volume and contract pricing structured for mining and industrial buyers.

03 Quality You Can Verify

Manufactured under established quality management systems to recognised standards.

04 Reliable Supply

Stock planned against your maintenance schedule so you're never caught short.

05 Australian-Based

Local point of contact and local accountability on every order.

06 Mixed-Fleet Ready

One supplier across multiple equipment brands and filter types.

QUALITY & STANDARDS

Our filters are sourced from manufacturers operating under internationally recognised quality management systems, including ISO 9001 (quality), ISO 14001 (environmental) and TÜV-assessed production processes. Filter media — the core of every high-performance filter — is selected for filtration efficiency, durability and engine protection across all applications.

Easy Flow Filters is progressing toward its own ISO 9001 certification as part of our commitment to consistent, auditable supply for mining and industrial customers.

HOW WE WORK

1

Send Your List

Email part numbers or tell us the equipment you run.

2

We Cross-Reference

We confirm equivalents, specs and availability.

3

Quote & Approve

You receive clear pricing structured for your fleet.

4

Supply & Restock

We deliver and plan stock to your schedule.

Get a quote or cross-reference.

Send us your part numbers or tell us what equipment you run. We'll come back with equivalents, specifications and pricing.
