Technical Data Sheet

MAX DRAIN B125 POLYPROPYLENE

Specific Product Code: 160101

MAX Drain is a fully polypropylene drainage channel for the capture and transfer of surface water, suitable for driveway applications up to load class B125 (12.5 tonne).

Unit dimensions: L: 1000mm x W:131mm (EXT) x D: 98mm (EXT)
Grate Fixing: Each grating is secured by an M8 Screw and Locking Bolt
Conformity: Conforms to EN 1433
Accessories Available: Sump Unit, Bottom Outlet, End cap Outlet & End cap

Product Features: The MAX Drain features six connection points over the metre, 3 on each side. One at the centre and either end of the channel allowing for ease of use for when you have to change direction. Eliminating the need for extra accessories such as corner units.

B125 Polypropylene Grating ensures no rust and is a strong, lightweight and cost effective for a higher load class.
