ASERA CONSULTANCY
Insight. Strategy. Delivery.

FOCUSED OPERATIONAL IMPROVEMENT

IMPROVEMENT SPRINT

A short, focused engagement that turns an agreed operational priority into practical improvement - working alongside your team to analyse, design, test and embed a proportionate solution.

IMPROVEMENT SPRINT **FROM £2,500**

Typical starting scope: approx. 5 embedded days	**Practical delivery**
Focused on one agreed operational priority	**Defined scope & outcomes**

A GOOD FIT WHEN

- A priority has been identified and you need focused support to turn analysis into practical change.
- A process, workflow, layout or operating method needs redesigning, testing or standardising.
- Stock, fleet, asset, repair or fulfilment performance needs targeted intervention rather than a long programme.
- A KPI or visual-management framework needs to move from concept into usable day-to-day practice.
- You want independent challenge and hands-on advisory support while keeping ownership and decision-making with your team.

Turn a defined operational priority into practical, usable improvement.

Focused scope. Embedded support. Clear ownership retained by your team.

IMPROVEMENT SPRINT

ASERA CONSULTANCY

TYPICAL SPRINT AREAS

- Process redesign, bottleneck reduction and operational flow
- Warehouse, depot and fulfilment workflow or layout improvement
- Stock control, fleet utilisation, asset availability and repair flow
- KPI, performance-management and revenue-protection routines
- Lean, 5S, visual management, standard work and practical CI
- Capacity, consolidation and operational-readiness actions
- Operational technology, automation or workflow trials where they simplify work or improve control

HOW IT WORKS

01 Define the outcome

Agree the problem, desired outcome, boundaries, measures and what success will look like within the sprint.

02 Work alongside the team

Observe, analyse, design and test practical changes with the people who own the operation, using evidence rather than assumption.

03 Embed and hand over

Leave the client with clear actions, tools and ownership so the improvement can continue after the sprint ends.

WHAT YOU LEAVE WITH

- Approximately 5 embedded consultancy days within the typical starting scope.
- A defined improvement approach tailored to the agreed operational priority.
- Practical outputs such as process maps, action plans, KPI routines, standards or visual controls where relevant.
- Clear ownership, priorities and next actions for the client team.
- A concise close-out summary of what changed, what remains and any further recommendation.

WHAT THE SPRINT IS - AND IS NOT

The Sprint is an embedded advisory engagement with a defined operational scope. Asera can work closely with your team to help analyse, design, test and embed improvements, while the client retains management control and decision authority.

Unless expressly agreed in writing, Asera is not appointed as project manager, principal contractor, dutyholder, statutory compliance body or operational decision-maker. Major implementation, procurement or specialist technical sign-off is scoped separately.
